

²Blair Beekman. Monday, December 13 ,2021....Options with Covid-19 vaccine, and community safety.

b. beekman <>

Mon 12/13/2021 7:31 AM

[External Email]

Dear communities & local govts, of Santa Clara Co.,

I feel, elected officials and staff alike, within Santa Clara Co. local govts. need to make, more of an effort, to not only continue, to learn how to more openly explain & have conversations, with young people and everyday community, about the importance of continued good mask use. And that, taking a vaccine, can be good ways, towards good health care and community safety - But from this, begin to better explain, in some way, of how taking the vaccine, can actually be a part of, overall, good, healthy life choices, in our current relationship, with a new, internet, computer age.

I feel, the more Santa Clara Co.local govt., can find ways, to openly talk about the benefits, of the Covid-19 process, the more young people, and everyday community, more understanding, and less hostile, and less apathetic, in a more cooperative, shared, mature, and healthy process, we are all trying to better comprehend, in this pandemic era. These are the ideas, of better community safety, in the uses of honesty & acknowledgement. And not the continued use, of secrecy and fear.

Alameda Co. with a very strong Democratic Party base - does not yet have, a vaccine mandate, for its local govt workers. What do you think, is this logic & reasoning ? I feel, they are respecting, there can still be, options & choices, for people who will be uncomfortable, with the technology aspects, of the vaccine process. I hope these technology aspects, can be easier, to more openly define, in our future.

It seems, there is an early hope, the Omicron variant, will not be as threatening, at this time. But to note, its initial genetic variations, may begin to offer more trouble, in the next few years. For now, and for the remaining winter, and with respecting continued mask use, I hope the pandemic, can be kept, from mass breakouts. With, 'a one day at a time' philosophy', at this time - it may be possible, we can simply continue, to monitor & gauge, our current good practices, of community safety practices, and the severity, of Covid-19 spread and growth. I feel we are keeping the current spread, in check.

Despite the new Covid-19 omicron variant arriving, and what its long term future may mean, I feel, in the short term, and for the next six months - this country, may still have, a bit of time & room, in its choices, of how to move forward, to limit the spread of Covid-19, in the next few years, without a mandatory vaccine process. We can respect, the continued use of maske, good new air-filtration systems, and even, continued good hand washing. People want their good health, and at this point, may be willing to voluntarily take the vaccine.

This winter, and with time, I hope we can learn, new important ways, to openly describe to each other, how we have come to understand & rationalize, that taking the vaccine, can be healthy and good. And to continue to learn creative ways, within community health and safety, to help people, who do not want to take the vaccine, at this time. I feel, it is important, we do not have to expand, mandatory vaccinations, of local govt. workers, to the private business community, as New York city, is currently considering, by this February 2022..

I hope Santa Clara Co. and the city of San Jose, can learn to much respect, and allow good forgiveness plans, for local govt. workers, and people, who will still be uncomfortable, with this taking the vaccine.

For over 5 years now, better accountability and open public policies, for the future of technology, has worked much, in how we can all leave, the era of 9.11.01, war, and its opaqueness. I hope its ideas, of open public policies and guidelines, that can be of help, to offer a neutral space, that can help facilitate, an open dialogue, for all sides. And what can be, continued good practices, of a local community democracy, based on peace, openness, and positive sustainability. And not the continuing use, of war, harm, and its secrecy, to define our community practices.

sincerely,
blair beekman

2. Blair Beekman. Thursday, December 30, 2021.....In hoping for less harm, with the Omicron variant.

b. beekman <

Thu 12/30/2021 1:15 PM

[External Email]

Dear Bay Area govts. and local communities,

To offer, in my 2nd letter, of today - As the name, Omicron, can suggest, we are trying to better understand, the future directions of this Covid-19 variant, and the future of the Covid-19 pandemic. We may be at new beginnings, to better control the pandemic, in the next few years. Or that, it is possible, that by this time, next fall, the Omicron Covid-19, can mutate, into hurtful, new ways. As the new, Covid-19 omicron variant is growing, and the need of community public health & safety provisions, is important, at this time - it seems there is an early promise, and an open, media process, that is offering, that the Omicron variant, may not be as strong, as the previous Delta variant.

It is from this, that it is my hope, that for at least, this winter- the state of Ca. may still have, a bit of time & room, in its choices, of how to address community public health & safety. From this, it is my hope, local Bay Area govts. can continue to create, an openness & awareness of public health concerns, and the use of masks, in community gathering space. I feel these can be important ways, to help avoid, a mandatory vaccine process, for the private sector, and for local school children, by this February.

And where the vaccine process, is currently mandatory, in the Bay Area, for local govt. workers - we need to learn, how to better develop, and to continue - cooperative, negotiative, forgiveness plans, for those who will still be uncomfortable, with taking the vaccine.

I feel, we are looking for ways, we can all grow more comfortable, n living our lives, by better understanding Covid 19, and the vaccine process. As I have been trying to much describe, this fall - we need to be continually looking for ways, to more openly describe - how taking the vaccine, can offer good health. for an individual person. And that can help limit the future spread, of the disease, throughout a community, or area.

Yet, local elected officials, are having trouble. openly describing - how do we learn to better talk about, and make clear, the nanotechnology involved, with the vaccine process. Many people, simply want good health, and will continue, to be willing to take the vaccine, and its boosters, in the following months and years.

Local Bay Area elected officials, need to learn, to more openly speak the language, of how everyday people, parents, and young people, in the SF Bay Area, are all learning, to openly acknowledge, address, and rationalize, how the vaccine process can become, a more regular part of our lives. And in, an ever growing world, of digital & internet technology.

We are at a time, to ask how ACLU surveillance and data collection technology guidelines, open public policies, and Ca. state legal precedents, based on good minded, civil rights and civil protections ideas, can offer a framework, toward a more shared role, between everyday community, and their local govt. And create a neutral space, for all parts of a community, to help better address, navigate, and facilitate, our better democratic ideals, within the short term & long term, community public health questions of the Covid-19 era.

I feel this can help much, to address, hostility, confusion, and apathy, within a community. I feel, with the ideas of a liberal democracy, we can work to structure, a cooperative, shared dialogue, of community accountability, open democratic sustainability, and peace. These are ideas, of openness, community harmony, public health & safety, at this time. These are ideals, of a more participatory future, for local community democracy. And can help develop, a future of better public oversight. at the local level.

The past 20 years, of 9.11.01, continual war, and the Covid-19 pandemic, are the ideas, of state violence and extremism, as how to build, long term, large scale, societal planning goals, both locally, and across the world. We are at a time, to better consider, how ideas of reimagine, equity, open public policies, and accountability - have also been also building, for years, if not decades. These are ideas, that are usually based on, peace, better reasoning, and simply to not harm each other, in the long term social planning questions, of community sustainability, at the local level. Collectively, this good thinking, at the local level, can eventually set an important course, how our national and intl. govts. will then want to make, more life affirming policy decisions, in the future.

sincerely,
blair beekman
