

RESOLUTION NO. \_\_\_\_\_

**A RESOLUTION OF THE COUNCIL OF THE CITY OF SAN JOSE ADOPTING THE DOVE HILL MEDICAL CARE FACILITY PROJECT MITIGATED NEGATIVE DECLARATION, FOR WHICH AN INITIAL STUDY WAS PREPARED, ALL IN ACCORDANCE WITH THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, AND ADOPTING A RELATED MITIGATION MONITORING AND REPORTING PROGRAM**

**WHEREAS**, prior to the adoption of this Resolution, the Planning Director of the City of San José prepared an Initial Study and approved for circulation a Mitigated Negative Declaration for the Dove Hill Medical Care Facility Project under Planning File Nos. PDC14-051 and PD16-019 (the "Initial Study/Mitigated Negative Declaration"), all in accordance with the requirements of the California Environmental Quality Act of 1970, together with state and local guidelines implementing said Act, all as amended to date (collectively "CEQA"); and

**WHEREAS**, the Dove Hill Medical Care Facility Project (the "Project") analyzed under the Initial Study/Mitigated Negative Declaration consists of rezoning a 21-acre project site from Agriculture Zoning District to the PQP(PD) Planned Development Zoning District to allow the demolition of all existing buildings, structures, trees and landscaping, and associated improvements; allow the construction of a medical care facility with two buildings with a total building area of 141,359-gross square feet containing a total of 155 patient rooms and up to 248 beds, all within only three acres ("development footprint") of the 21 acres; and allow the remaining 18 acres to be maintained as undeveloped, permanent private open space (Open Hillside Zoning District). The project site is located at 4200 Dove Hill Road in south San José, adjacent to the east side of United States Highway 101 (US 101), in the City of San José

(Assessor's Parcel Number 679-08-003 and 679-09-001, 679-08-002 and 679-09-002), San José, California; and

**WHEREAS**, the Initial Study/Mitigated Negative Declaration concluded that implementation of the Project could result in certain significant effects on the environment and identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

**WHEREAS**, in connection with the approval of a project involving the preparation of an initial study/mitigated negative declaration that identifies one or more significant environmental effects, CEQA requires the decision-making body of the lead agency to incorporate feasible mitigation measures that would reduce those significant environmental effects to a less-than-significant level; and

**WHEREAS**, whenever a lead agency approves a project requiring the implementation of measures to mitigate or avoid significant effects on the environment, CEQA also requires a lead agency to adopt a mitigation monitoring and reporting program to ensure compliance with the mitigation measures during project implementation, and such a mitigation monitoring and reporting program has been prepared for the Project for consideration by the decision-maker of the City of San José as lead agency for the Project (the "Mitigation Monitoring and Reporting Program"); and

**WHEREAS**, the City of San José is the lead agency on the Project, and the City Council is the decision-making body for the proposed approval to undertake the Project; and

**WHEREAS**, the City Council has reviewed and considered the Initial Study/Mitigated Negative Declaration and related Mitigation Monitoring and Reporting Program for the Project and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

**WHEREAS**, the Initial Study/Mitigated Negative Declaration and related Mitigation Monitoring and Reporting Program for the Project are on file in the Office of the Director of Planning, located at 200 East Santa Clara Street, 3rd Floor Tower, San José, California, 95113, are available for inspection by any interested person at that location and are, by this reference, incorporated into this Resolution as if fully set forth herein;

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF SAN JOSE:**

**THAT THE CITY COUNCIL** does hereby make the following findings: (1) it has independently reviewed and analyzed the Initial Study/Mitigated Negative Declaration and other information in the record and has considered the information contained therein, prior to acting upon or approving the Project, (2) the Initial Study/Mitigated Negative Declaration prepared for the Project has been completed in compliance with CEQA and is consistent with state and local guidelines implementing CEQA, and (3) the Initial Study/ Mitigated Negative Declaration represents the independent judgment and analysis of the City of San José, as lead agency for the Project. The City Council designates the Director of Planning at the Director's Office at 200 East Santa Clara Street, 3rd Floor Tower, San José, California, 95113, as the custodian of documents and records of proceedings on which this decision is based.

**THAT THE CITY COUNCIL** does hereby find that based upon the entire record of proceedings before it and all information received that there is no substantial evidence that the Project will have a significant effect on the environment and does hereby adopt the Mitigated Negative Declaration and related Mitigation Monitoring and Reporting Program prepared for the Project (Planning File Nos. PDC14-051 and PD16-019). The Mitigation Monitoring and Reporting Program for the Project is attached hereto as Exhibit "A" and fully incorporated herein. The Initial Study/Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program are: (1) on file in the

Office of the Director of Planning, located at 200 East Santa Clara Street, 3rd Floor Tower, San José, California, 95113 and (2) available for inspection by any interested person.

ADOPTED this \_\_\_\_ day of \_\_\_\_\_, 2018, by the following vote:

AYES:

NOES:

## P R E F A C E

Section 21081.6 of the California Environmental Quality Act (CEQA) requires a Lead Agency to adopt a Mitigation Monitoring and Reporting Program whenever it approves a project for which measures have been required to mitigate or avoid significant effects on the environment. The purpose of the monitoring and reporting program is to ensure compliance with the mitigation measures during project implementation.

The Initial Study/Mitigated Negative Declaration prepared for the Dove Hill Medical Care Facility Project concluded that the implementation of the project could result in significant effects on the environment and mitigation measures were incorporated into the proposed project or are required as a condition of project approval. This Mitigation Monitoring and Reporting Program addresses those measures in terms of how and when they will be implemented.

This document does *not* discuss those subjects for which the Initial Study/Mitigated Negative Declaration concluded that the impacts from implementation of the project would be less than significant.

I, John [unclear], the applicant, on the behalf of Angels Co. Inc., hereby agree to fully implement the Mitigation Measures described below which have been developed in conjunction with the preparation of an Initial Study/Mitigated Negative Declaration for my proposed project. I understand that these mitigation measures or substantially similar measures will be adopted as conditions of approval with my development permit request to avoid or significantly reduce potential environmental impacts to a less than significant level, where feasible.

	Method of Compliance or Mitigation Action	Timing of Compliance	Oversight Responsibility	Actions/Reports	Monitoring Timing or Schedule
<p>construction surveys for nesting raptors and other migratory nesting birds shall be conducted by a qualified ornithologist to identify active nests that may be disturbed during project implementation on-site and within 250 feet of the site. Projects that commence demolition and/or construction activities between February 1st and April 30th (inclusive) shall conduct a pre-construction survey for nesting birds no more than 14 days prior to initiation of construction, demolition activities, or tree removal. Between May 1st and August 31st (inclusive), the pre-construction survey shall be conducted no more than 30 days prior to initiation of construction, demolition, or tree removal activities.</p> <p>If an active nest is found in or within 250 feet of the project area, a qualified ornithologist, in consultation with the California Department of Fish and Wildlife (CDFW) shall determine the extent of a construction-free buffer zone (typically 250 feet for raptors and 100 feet for other birds) around the nest, to ensure that raptor or migratory bird nests would not be disturbed during ground disturbing activities. The construction-free buffer zones shall be maintained until after the nesting season has ended and/or the ornithologist has determined that the nest is no longer active.</p>	<p>construction nesting bird survey shall be conducted by a qualified ornithologist and construction-free buffer zones shall be designated around any discovered nest.</p> <p>Following completion of the preconstruction survey, the project applicant shall submit a report prepared by a qualified ornithologist to document the results of the survey and any designated construction-free buffer zones.</p>		<p>CDFW, if an active nest is found.</p>	<p>Review the pre-construction survey report indicating the results of the survey and any designated buffer-zones.</p>	<p>permits or activities.</p>

MITIGATION	MONITORING AND REPORTING PROGRAM				
	Documentation of Compliance [Project Applicant/Proponent Responsibility]		Documentation of Compliance [Lead Agency Responsibility]		
	Method of Compliance or Mitigation Action	Timing of Compliance	Oversight Responsibility	Actions/Reports	Monitoring Timing or Schedule
The ornithologist shall submit a report indicating the results of the survey and any designated buffer zones to the satisfaction of the Supervising Environmental Planner of the City of San José Department of Planning, Building and Code Enforcement prior to issuance of any tree removal, grading, demolition, and/or building permits or activities (whichever occur the earliest).					
<b>Impact BIO-3:</b> Demolition of buildings on the site could result in injury and/or mortality of roosting bats.					
<b>MM BIO-3.1: Bat Surveys.</b> Prior to removal of trees, demolition, grading, or building activities (whichever occurs the earliest), a survey of existing buildings shall be completed by a qualified bat biologist to determine whether the site supports a maternity roost of any bat species. The survey shall be conducted during the breeding season (March 1st to August 31 <sup>st</sup> , inclusive). If the survey must be conducted during the non-breeding season (i.e., September 1st to February 28 <sup>th</sup> , inclusive), and if no evidence of bat roosts is found, it can be concluded that no maternity roost is present. However, if the survey is conducted during the non-breeding season and evidence of a bat day roost is observed, then prior to building demolition, a follow-up survey shall be completed during the breeding	A pre-construction survey of maternity bat roosts shall be conducted by a qualified bat biologist.  Following completion of the preconstruction survey, a report prepared by a qualified bat biologist shall be submitted summarizing method of detection and recommendation of removal (if roosts are found).	Prior to tree removal, grading, demolition, and/or building permit or activities.	Supervising Environmental Planner of the San José Department of Planning, Building, and Code Enforcement	Review the pre-construction survey report indicating the results of the survey, as well as any recommendations for removal.	Prior to issuance of any tree removal, grading, demolition, and/or building permits or activities.

season (March 1 <sup>st</sup> to August 31 <sup>st</sup> , inclusive) to determine whether a maternity roost is present. If suitable roost sites are found but a visual survey is not adequate to determine presence or absence of bats (which would be particularly likely in the case of potential roost trees), acoustical equipment shall be used to determine occupancy. A preliminary report shall be submitted to the Supervising Environmental Planner of the City of San José Department of Planning, Building and Code Enforcement by the qualified bat biologist summarizing method of detection and recommendation of removal.					
<b>MM BIO-3.2: Bat Eviction.</b> If a maternity roost would be impacted, and the roost supports either a special-status species or a regionally important proportion of the population of a non-special-status species (e.g., two percent or more, in the opinion of a qualified bat biologist), an alternative bat roost structure shall be provided. The design and placement of this structure shall be determined by the bat biologist based on the species of bat to be displaced, the location of the original roost, and the habitat conditions in the vicinity. This bat structure shall be established at least one month prior to removal of the original roost structure. This structure shall be checked during the breeding season for up to three years	<p>If maternity roosts would be impacted, an alternative bat roost structure shall be provided.</p> <p>Eviction of bats from structures or trees under the guidance and supervision of a qualified bat biologist.</p> <p>Additional surveys for roosting bats to determine whether bats have</p>	Prior to issuance of any tree removal, grading, demolition, and/or building permits or activities.	Supervising Environmental Planner of the San José Department of Planning, Building, and Code Enforcement	Review bat roost structure, eviction methods, and survey 15 days prior to beginning of demolition activities.	Prior to issuance of any tree removal, grading, demolition, and/or building permits or activities.

<p>If a day roost is found in a building that is to be removed, individual bats shall be safely evicted under the direction of a qualified bat biologist. Eviction of bats shall occur at night, so that bats will have less potential for predation compared to daytime roost abandonment. Eviction shall occur between September 1st and March 31<sup>st</sup> (inclusive), outside the maternity season, but will not occur during long periods of inclement or cold weather (as determined by the qualified bat biologist) when prey are not available or bats are in torpor. If a day roost is found within a building, eviction shall occur as directed by the bat biologist such as by opening the roosting area to allow air flow through the cavity. Demolition shall then follow no sooner than the following day (i.e., there shall be no less than one night between initial disturbance for air flow and the demolition) to minimize predation during daylight. If determined infeasible by the bat biologist due to structural or safety concerns, one-way doors shall be used to evict bats from tree roosts. If use of a one-way door is not feasible, as determined by the bat biologist, or the exact location of the roost entrance in a tree is not known, the trees with roosts that need to be removed shall first be disturbed by removal of some of the trees' limbs not containing the bats. Such disturbance shall</p>

<b>Impact HAZ-2:</b> Site construction workers and future patients may be exposed to elevated levels of the pesticides chlordane and dieldrin that were detected in soil samples at the site in the vicinity of the project.					
<p><b>MM HAZ-2.1:</b> Prior to issuance of any grading permits, the project applicant shall conduct additional soil sampling near the project to establish the vertical and lateral extent of soil contamination. The Santa Clara County Department of Environmental Health and/or another regulatory agency shall be consulted to evaluate requirements for regulatory oversight. Remedial measures shall be established with oversight from the regulatory agency to reduce health risks to future users of the site from exposure to the impacted soil. Remedial measures may include: 1) excavation and off-site disposal of the impacted soil at a permitted facility; 2) the use of engineering and administrative controls, such as consolidation and capping of the soil on-site and land use covenants restricting certain activities/uses; and 3) a combination of the above.</p> <p>The project applicant shall submit a copy of the soil sampling report and proposed remedial measures to the Supervising Environmental Planner of the Department of Planning, Building, and Code Enforcement, and the Environmental Services Department prior to the issuance of any grading permits.</p>	Soil sampling to determine lateral and vertical extent of contamination and establish remedial measures.	Prior to issuance of grading permits	Santa Clara County Department of Environmental Health or equivalent agency  Supervising Environmental Planner of the Department of Planning, Building, and Code Enforcement, and the Environmental Services Department	Review soil sampling and establish remedial measures.  Receive a copy of the soil sampling reports and proposed remedial measures.	Prior to issuance of any grading permits.
