<b>Smart Mobility</b>				
<b>Smart Infrastructure</b>	STIR Compliance Management Tool			
<b>Safe City</b>	STIR Disaster Response Platform			
<b>IT Roadmap</b>				
<b>Equity</b>	Unleash Your Geek #3 - Homelessness	2020 Census Technology Conversation	Community Wi-Fi & Educational Performance Access Eastside	STIR Affordable Housing Compliance System
<b>Climate Smart</b>				

# SMALL WONDERS APRIL 2019

LEGEND – PROJECT STATUS

ON TRACK

ISSUES WITH SCHEDULE, BUDGET OR SCOPE

AT RISK, CORRECTIVE ACTIONS NEEDED

# Start up In Residence (STIR)

- Connects city governments with startups to help solve civic challenges through technology solutions and process improvements
- STIR provides the City a turn-key solution by expediting the procurement process and evaluating options to allow an idea to be demonstrated and if proven, the company can enter into a contract with the City
- City of San Jose is one of 22 agencies for STIR 2019 cohort and currently City is working on four challenges listed below:

Housing	Affordable Housing Compliance System
Public Works	Compliance Management Tool
Office of Emergency Management and Housing Disaster Response Platform	Disaster Response Platform
Office of Economic Development	Online Street Banner Asset Management and Booking System

# Streetlight Banner Online Reservation and Asset Management Platform

STIR 2019 Cohort – City of San Jose

Sal Alvarez, Executive Analyst  
Office of Economic Development

Apu Kumar, CEO  
LotaData, Inc.

# The background

- Manage 1,000+ streetlight banner locations citywide
- Receive 25 to 30 applications per year
- Install/remove 1,700 to 2,000 banners per year
  - Campaigns are as small as 18 to as large as 300 banners
- Continued demand and interest for events held at public facilities has increased the use of streetlight banners for placemaking and public messaging
- Currently, no 'off the shelf' software management system is available.

# The challenge

- Current process is paper based and applicants do not have visibility into what is available
- Demand during 'High seasons' causes multiple overlapping requests
- Telecom small-cell deployment may potentially impact banner program

**CITY OF SAN JOSE**  
CAPITAL OF SILICON VALLEY

### TEMPORARY BANNER APPLICATION

**I. APPLICANT INFORMATION**

APPLICANT ORGANIZATION: Team San Jose  
BILLING ADDRESS: 400 Almaden Blvd. ZIP CODE: 95110  
CONTACT PERSON: Jennifer Aguirre  
PHONE: (408) 792-4559  
E-MAIL: jaquirre@sanjose.org WEB SITE: www.sanjose.org  
EVENT NAME: WWDC 19 EVENT DATE(S): 6/13-6/17  
REQUEST INSTALLATION DATE: 5/18/19 DATE REMOVED: 6/10  
NUMBER OF VERTICAL BANNERS TO BE INSTALLED: 235  
BANNER MESSAGE: WWDC 19

**II. REQUIRED ATTACHMENTS**

BANNER LOCATION SITE MAP   
BANNER DESIGN, COLORS, WORDING AND DIMENSIONS

**III. ACKNOWLEDGMENT**

I HEREBY ACKNOWLEDGE THAT I HAVE RECEIVED THE BANNER GUIDELINES LITERATURE.  
I CERTIFY THAT ALL THE INFORMATION CONTAINED IN THIS APPLICATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE.  
Signature: Jennifer Aguirre Date: 3/26

**ALMADEN BL NORTH**

*Handwritten notes on map:* Market de Area, Deloitte, office building, parking, TOTAL REQUESTING: 210, UNION BANK, REQUESTING: 10

**LIGHTSTON AL**

*Handwritten notes on map:* SOUTH MARKET STREET, The Glasshouse, San Jose Evergreen Community College, South Bank

# The challenge - continued

- Applicants can reserve locations several years in advance with no requirements for providing a deposit
- Current fees only cover DOT staff time for installation or removal and not based on duration of banner installed on streetlight
- No application fee
- Invoices are paid only via mail-in check
- Existing ArcGIS platform is unable to accommodate multiple applications (location, time, creative, point of sale and public interface)

# The benefit

Project will modernize the banner program to provide greater clarity for applicants and improve operational efficiency of staff:

- Provides reservation and availability information in real time
- Provides an option for point of sale portal integration for payments to be collected electronically
- Utilizes data to verify best locations for banners placement
- Provides data to the applicants showing impressions frequency and dwell times
- Uses impressions and dwell time data to better understand the value of infrastructure

# The process

- This project will generate a Minimum Viable Product (MVP) with a focus on improved operational efficiency
- Use of whiteboarding and process mapping helped to visualize various workflows
- Leveraged LotaData's experience in billboard management to identify opportunities to prioritize venues
- Utilized existing GIS platform accelerated application development

# Our lessons learned and insights

- Capability exists for point of sale element integration that allows web pages to have the “button” designed into them
- Banner program is highly valued by our partners – generates revenue for them and City
- Need for continued collaboration with Small Cell Team
- Create transparent schedule for banners for better customer service
- Need for Automation of email messages
- Utilization of cellular geo temporal data will provide more accurate people counts and will help to prioritize resource allocation over time

# Product Demonstration
