Dear sj community and city govt. ,

With item 2.21, I hope, with the charitable gift drive, for the Evans lane, transitional housing program we can be reminded, that the future use, of good new state and federal subsidies, should be meant for people, of low income and not for, rich housing developers.

And an overall good luck, that we can all rally, to ask the CPUC and PG&E, to learn a better reasoning, how an entire solar industry process, can continue to become, more open & accessible. And to people, of low income, and local community energy.

sincerely,  
blair beekman
