[External Email]

Dear community of San Jose, and city govt.

Open, public policy ideas & accountability, are ideas, of better reasoned, democratic practices, at the local community level.

These are ways to work toward & address, ideas of peace. And ask for an end, to continual war.

To trust the sharing, of open public policy ideas, is our dependable, well-structured practices, of good democracy, that can help address & ease the tensions of cybersecurity.

And its deep, warlike needs of secrecy.

sincerely,
blair beekman
