RE: Rotten Robbie Project – Oakland Road and Commercial Street

Dear Councilmember Peralez:

Fuel Delivery Services, Inc (FDS) supports the proposed Rotten Robbie project at Oakland Road and Commercial Street.

FDS, Inc. is a transporter of refined petroleum products, with 3 truck terminals in the Bay Area. Our San Jose terminal, located down the street from the proposed Rotten Robbie project, has 36 drivers and 15 trucks. San Jose has very few options for industrial and commercial businesses with large and medium trucks that need diesel fuel, especially tractor/trailers like we operate. We want to stay and grow in San Jose and every year the cost of doing business rises. Having a large, convenient facility like the proposed Rotten Robbie provides essential services to our business and businesses like ours. Also, an upgraded facility will be more attractive and help improve the Oakland Road/Commercial Street area.

Thank you for your consideration.

Jennifer Clark
