TO: City Department of San Jose
FROM: Universe Stalkers 44661

To whom it may concern,

We are an FLL(First Lego League) team, the Universe Stalkers 44661. The FLL challenge includes a section called the Innovation Project, a task in which the team performs research on a specific topic and presents a solution/opinion for it. Our team is working on preventing graffiti, as we know it is a growing and annoying problem in cities.

Graffiti in some cities is a big problem and we thank you for working so hard to keep the city clean. Graffiti on one's property could make the property less valued, and it will negatively affect the profits of the business. For example, if a business building has graffiti on it, people may think that the business is bad and dirty and it should not deserve customers. Next, it will make citizens around feel unsafe. For instance, if there is an abandoned apartment, full of graffiti and gang marks, people living around may feel scared and not willing to be social to the other people around them. Lastly, graffiti on road signs are a big danger to drivers. For example, it may lead to them driving the other way when there is a "One Way" sign in front of them.

Our idea to help make the city cleaner is to grow plants in graffiti-vulnerable places, because plants are eco-friendly and can do a very good job at covering a surface. We do not need to remove graffiti every time with a huge maintenance cost.

To test our solution, we would like to suggest the city start growing plants and increase the amount of plants in our city in order to prevent graffiti. Please help us install plants in front of the walls to protect property, or even cover existing graffiti. We also suggest creating a program in which the city can provide plants for homeowners who want to grow plants for free or at a lower price.

Thank you for your time and consideration,

Universe Stalkers, 44661

Subject: Concerned about e-cigarettes and nicotine

Dear Mayor Sam Liccardo,

I'm concerned about the recent public health outbreak involving vaping. The number of hospitalizations seems to be multiplying. Many patients require respirators to keep them alive. Sadly, some don't make it. It's time we do something in our community to protect our kids.

As you may already know, tobacco companies use flavors and tech-inspired devices to lure kids into vaping. This, coupled with unchecked online purchasing, gets toxic tobacco products past parents and teachers, straight into the hands of kids.

The youth in our area face enough challenges in this time of their development. We should be setting them up for success, not saddling them with addiction, neurotoxins, serious lung damage, and long-term health threats that are still unknown.

They deserve better.

I ask for your leadership in addressing how we can keep our kids safe from an industry determined to do them harm.

Sincerely,
Jenny Reynolds

Subject: opposing the vape ban

I am writing this letter regarding the vape ban that has helped me get off the cigarette for more than 5 years. I feel much healthier physically and mentally compare to the past. I also have gotten my family members to quit smoking cigarette to vaping and they feel healthier and have no more symptoms of hard breathing, chest pain at night. I know that this has an impact on kids but there is a better option like more enforcements like alcohol with the zero tolerance with fines and even jail time. Don't hurt the older adult for their needs, for they need to vape in order to not return back to cigarettes. Thank you for listening and please don't hurt the older adult with this vape ban.
