- B. “Dead tree” means a tree that is no longer alive, has been removed beyond repair, or is in an advanced state of decline (where an insufficient amount of live tissue, green leaves, limbs or branches exists to sustain life) and has been determined to be in such a state by a certified arborist during a non-dormant or other natural stage of the tree that would minimize the likelihood that the tree would be mistakenly identified as being in such a dead state.
- C. “Director” means the Director of Planning, Building and Code Enforcement of the City of San José or such other person designated by the City Manager to administer and enforce the provisions of this Chapter.
- D. “Dripline” means the area around the base of a tree directly under the canopy cover of the tree and extending out as far as the canopy.

Such actions can include, without limitation and by way of example, excessive pruning, cutting, girding, poisoning, or watering of a tree; the unauthorized relocation or transportation of a tree; excessive excavation, alteration, or grading of the soil within the dripline of a tree, or excessively bruising, tearing or breaking the roots, bark, trunk or branches of a tree.

Such tree species shall be placed on an Unsuitable Tree species list which shall be adopted by the City Council by resolution, which resolution may be amended from time to time to add or delete certain tree species.
