Subject: For the Public Record Agenda Item 4.1 April 16, 2019

Clerk Taber and City Council,

Please attach this to the Public Record for Item 4.1 of today's Council Meeting.

I support the expansion of Shark's Ice as this project will help our City and it will help District 7 produce much needed revenue and jobs. However, we need to make sure that the park which currently occupies the land slated for development is also protected. Specifically, I am speaking about the San José Municipal Firing Range.

The range is considered a park, with park signage, and has been included in park literature in the past. Per our charter, park lands cannot be converted to another purpose without a vote of the people in a general election..

I believe we can expand Solar4America Ice and keep the range by simply changing the driveway of the proposal as attached. The red triangle would be removed from the current design and the green rectangle would be the new path for the driveway, It is a very simple and cost neutral solution that will optimize space and allow for bot the park and the ice center to flourish!

Thank you and all the best,

Jonathan Fleming
