[External Email]

Dear community of San José, and local govt.,

In considering, less than lethal use of force issues, I hope, a police peer review program, is also developing well.

As it can offer, mental health counseling & healing, to both police and everyday community.

And in real time.

The ideas of good mental health practices, and it's good reasoning, can simply work towards, a better health & human services future, for a community.

Sincerely,  
Blair Beekman
