

SMART CITIES AND SERVICE IMPROVEMENTS COMMITTEE

Data Initiatives and Impacts Status Report

Presented by:

Arti Tangri, Data Architect, Information Technology Department

Matt Loesch, Assistant Director, Department of Public Works

Vince Pereira, IT Manager, Department of Transportation

Albert Gehami, Digital Privacy Officer, Information Technology Department

Agenda

Highlighting projects on equity,
impact, and service improvement

- Background
- Department of Public Works (DPW)
- Department of Transportation (DOT)
- Looking forward: Building community partnerships

CITY DATA FACTS AND FOUNDATION WORK

- People
 - Hiring and Upskilling
 - Building Community
- Processes
 - Data Chartering
 - Privacy and Security Review
 - Vision Zero Data
- Tools
 - Centralized Data Platform
 - Geospatial Information System (GIS)
 - Extract Transform Load (ETL) platform
 - Self-service data visualization tools

RESIDENT ENGAGEMENT THROUGH DATA

Data Articles

Data Stories

Raw Data

Key outcomes:

1

Improving City services

2

Measuring Community Impact

3

Supporting Equity

4

Building Community Partnerships

PUBLIC WORKS AND GIS

Presented by:
Matt Loesch

Initial Goal

Develop open, interoperable, efficient data-centric system providing quality data to enterprise user community

Next Objective

Shift data focus toward integration, analytics, and decision support

How do we get there?

1. ETL platform with automated system integrations
2. Flexible toolset makes visualization and analytics with reach (ArcGIS Platform + Tableau)

San Jose Equity Atlas [Beta]

Race Income **Combined Score** Redlining

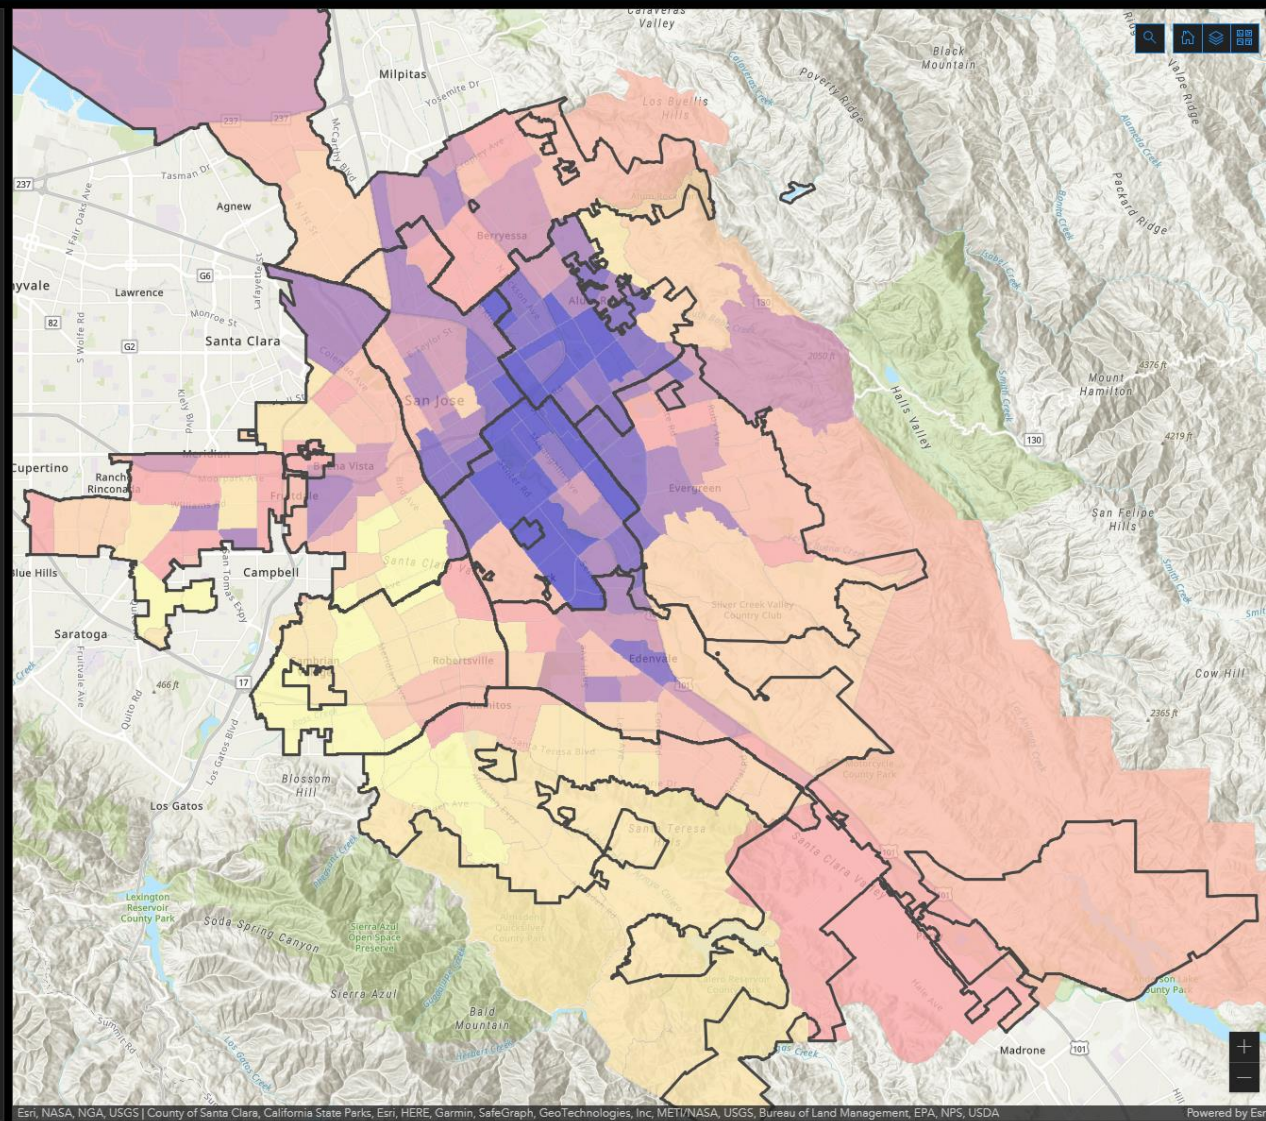

COMBINED SCORE

The combined score (range from 2 to 10) of the race and income tabs indicate that the higher the number, the higher the concentration of both people of color and low income households in the selected census tract.

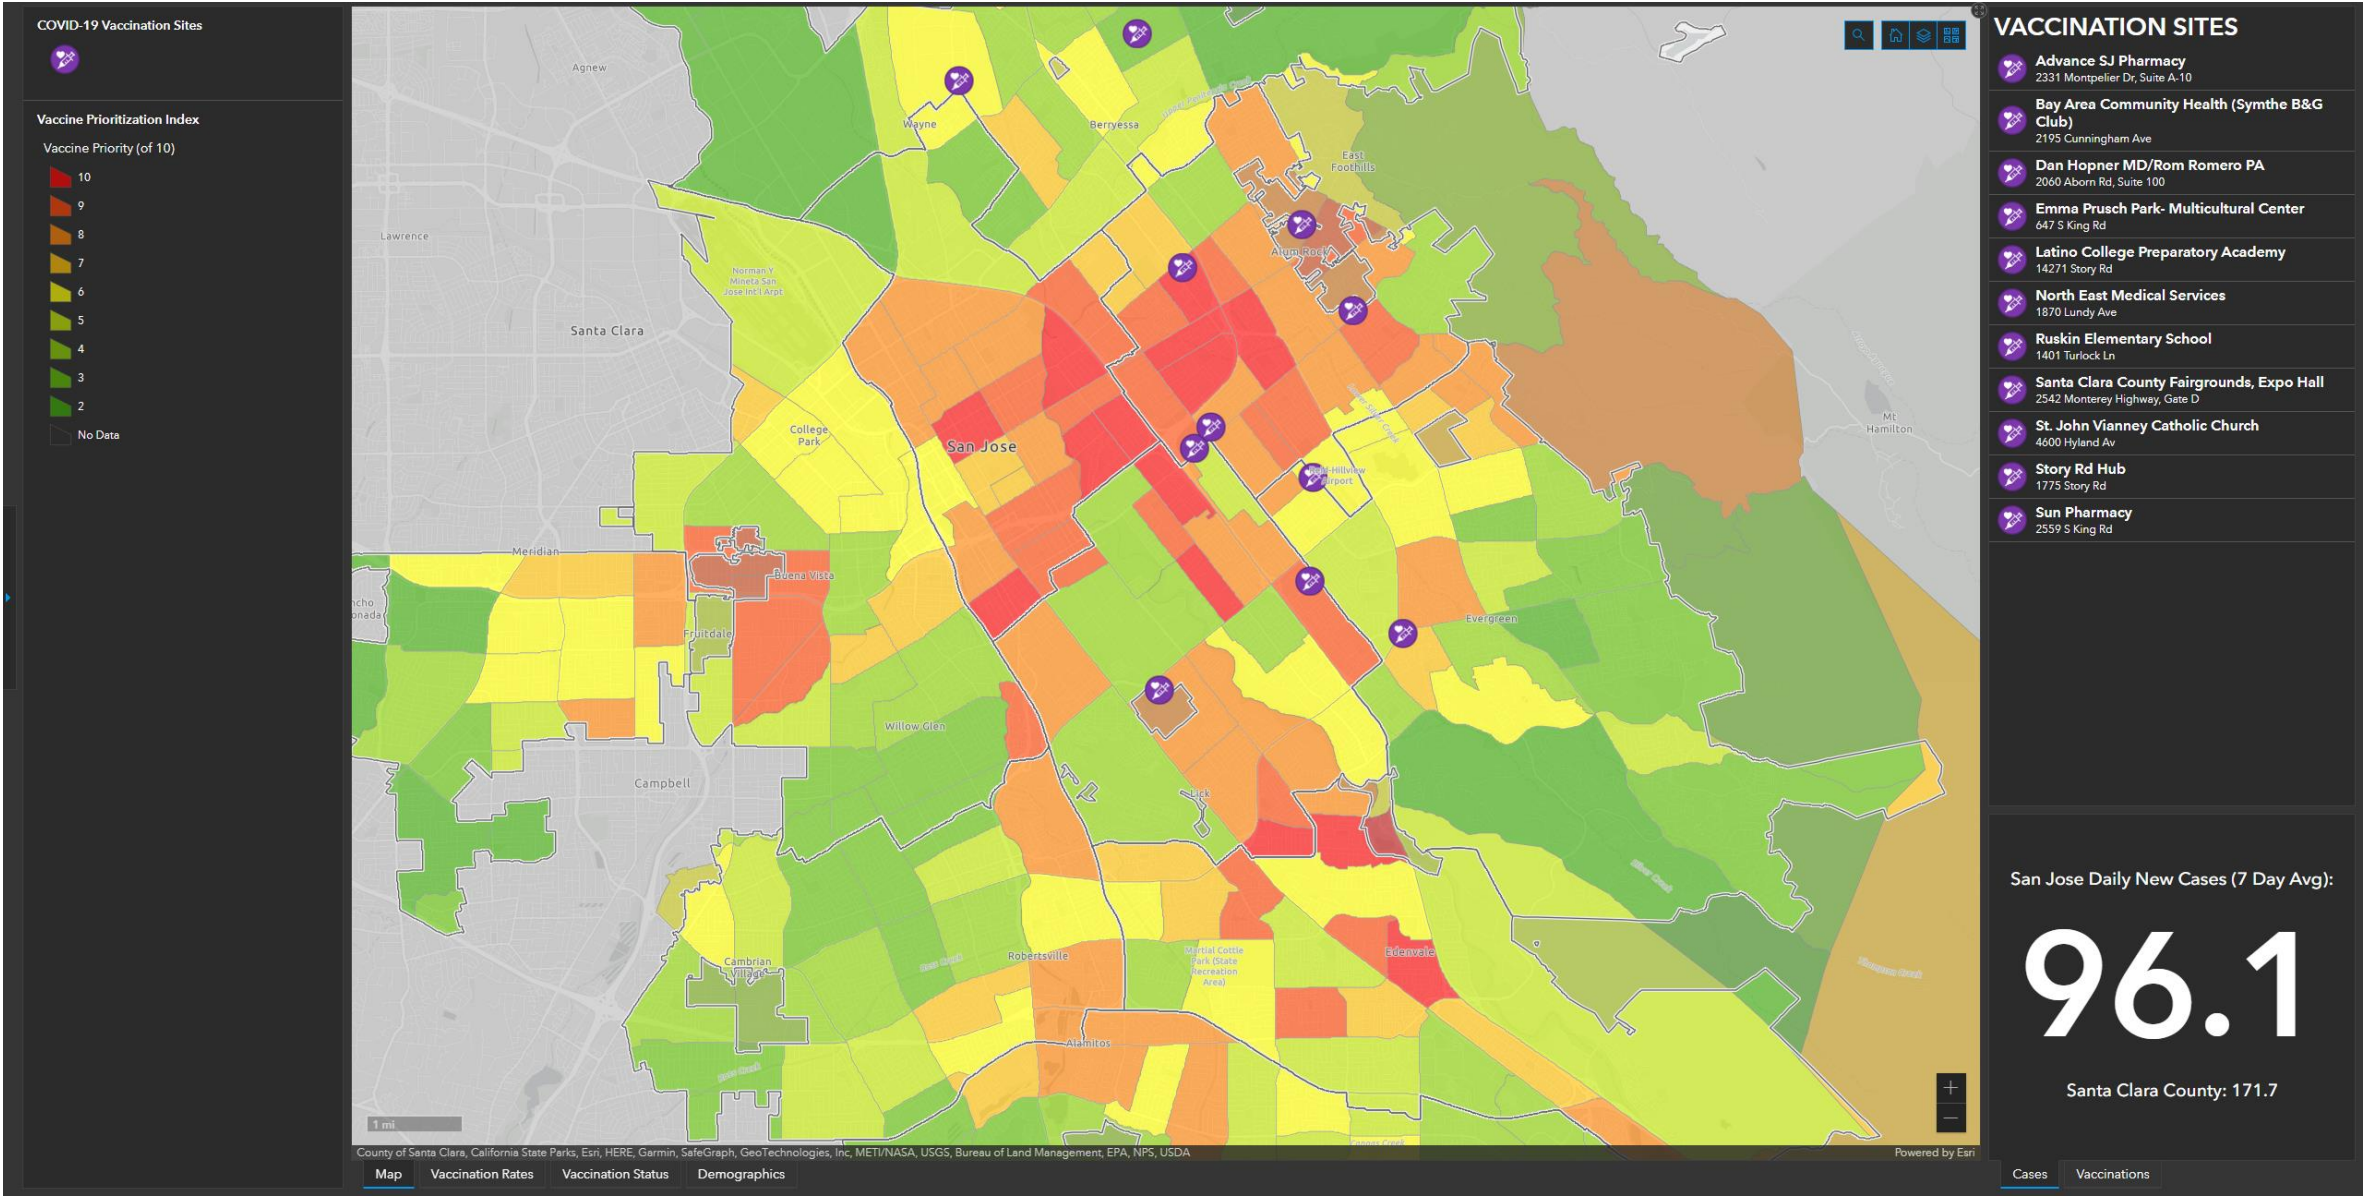

Census Tract Scores

BIPOC and Income Combined

DOT DATA INITIATIVES

Presented by:
Vince Pereira

KUDOS – TEAM EFFORT

- Sewers Engineering Team
 - Alberto Gaxiola, Arpit Patel, and Anjali Athavale
- DOT IT Team
 - Paolo Cervantes, Yan Xu, and Jay Van Biljouw

CENTRALIZED DATA, SALESFORCE, ANALYTICS

- Data standardization and consolidation
 - Increased organization and scalability
 - Single source of truth
- Consolidated Department of Transportation (DOT) Data Repository
- Improved data management and governance
- Recent applications developed on Unity
 - Full Trash Capture Applications
 - Ensuring all debris is captured prior to getting to the water ways
 - CMMS (Computerized Maintenance Management System)
 - Centralized data base that collects and maintain all Sewer Maintenance activities
- Reporting & Analytics
 - Single Source creating Reports, Dashboard, and Analytics

IMPACTS

- Improved efficiency to service San Jose sewer system
 - Simplifies workflow process to complete tasks
 - Provides accurate and consistent process to obtain and store data
 - Provides avenues to service our residents more efficiently
 - Receive, update and close out service requests via a single platform
 - Reduces resolution time with increased efficiency, by enabling field staff to update the work activities 'real-time'
 - Overall greater efficiency and optimization for sewer requests and maintenance needs
 - **Turning days of work into hours for both dispatch and the crews**
- Reduced time to produce historical data via Mobile App
 - Centralized storage (historical data) eliminates the need to check many drives and folders to obtain the data
 - Eliminates the need to consult with other colleagues to locate and obtain
 - **Reducing time to obtain and provide accurate information and analysis from 2-3 hours to 15 minutes**

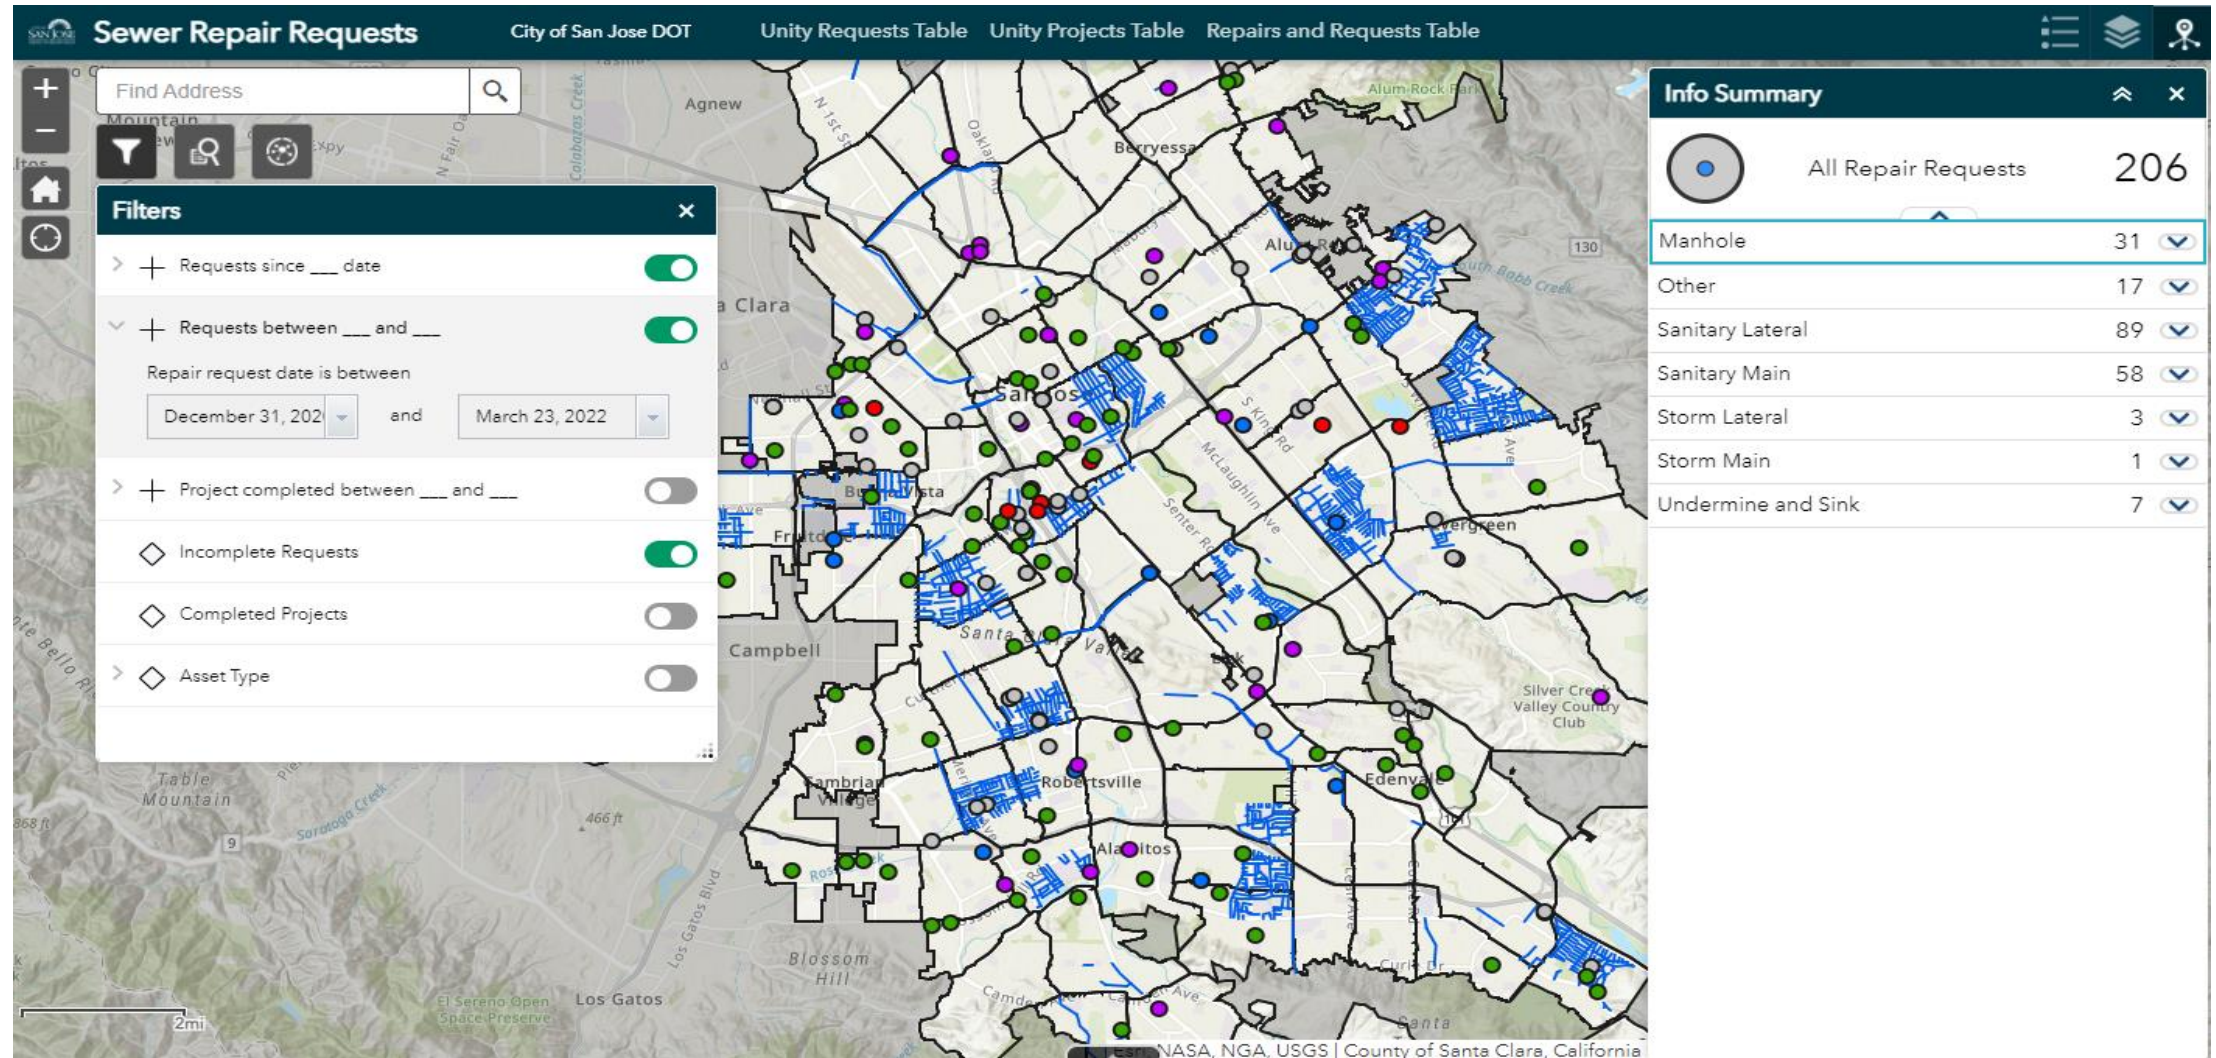

SEWER REPAIR – SINGLE SOURCE

Sewer Repair Timeliness Core Service

Priority	On Time	Missed	Pending
Manhole	7	0	0
Other	4	0	0
Sanitary Lateral	82	4	0
Sanitary Main	8	0	0
Storm Lateral	2	1	0
Storm Main	1	0	0
B	52	5	1
Manhole	2	0	0
Other	7	1	0
Sanitary Lateral	37	3	1
Sanitary Main	5	0	0
Storm Lateral	1	0	0
Storm Main	0	1	0
C	613	54	78
Manhole	23	5	7
Other	88	4	2
Sanitary Lateral	260	12	40
Sanitary Main	208	27	24
Storm Lateral	7	0	1
Total	769	64	206

Requests with no *Priority* category were *Received* within the report's date range but have not yet been escalated as a project.

LOOKING FORWARD: BUILDING COMMUNITY PARTNERSHIPS

Presented by:
Albert Gehami

PEOPLE: GROWING CAPACITY FOR DATA EQUITY WORK

Muscle

Brains

Equity through
Data & Privacy
program (EDP)

PROCESSES: COMBINING CITY EFFORTS ON KEY INITIATIVES

Key players

- EDP
- Office of Racial Equity
- Library
- PRNS
- MOTI
- PW
- DoT
- ITD
- COVID-19 Recovery Task Force

Key initiatives

- Digital Inclusion
- COVID recovery
- SJ311
- Data Chartering for “next-gen” services

Improve services

Enhance Equity

Measure impact

TOOLS: LEVERAGING PRIVATE PARTNERSHIPS

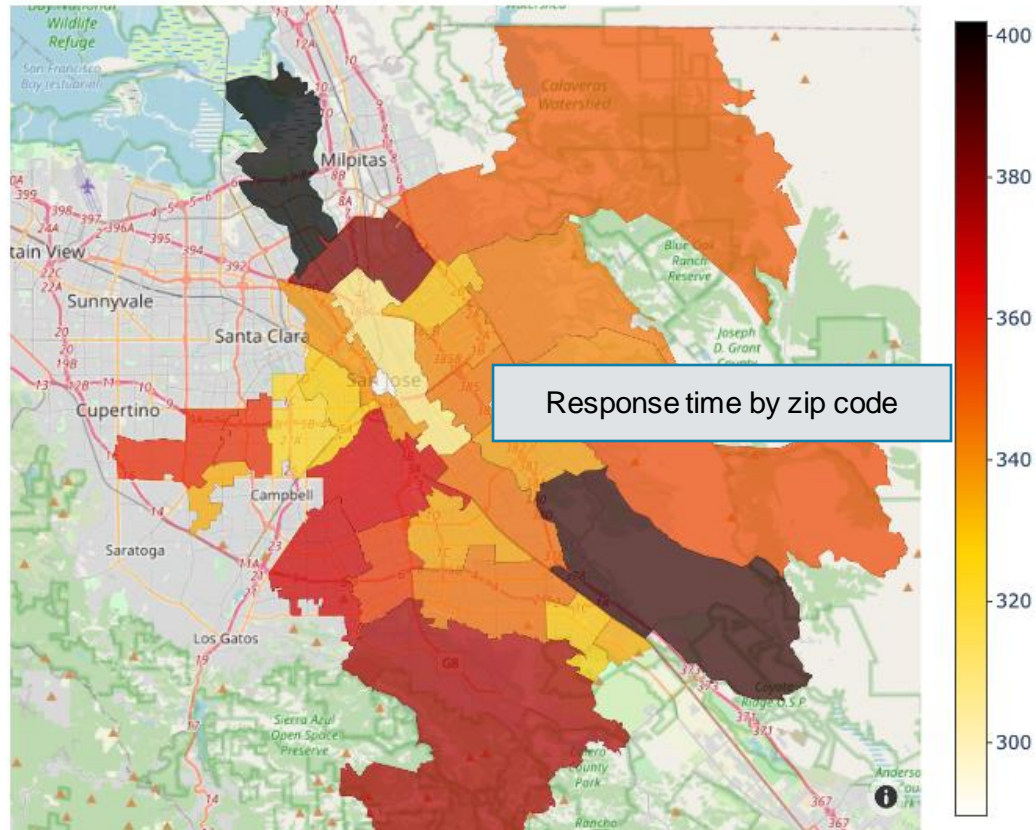

Analytics tools

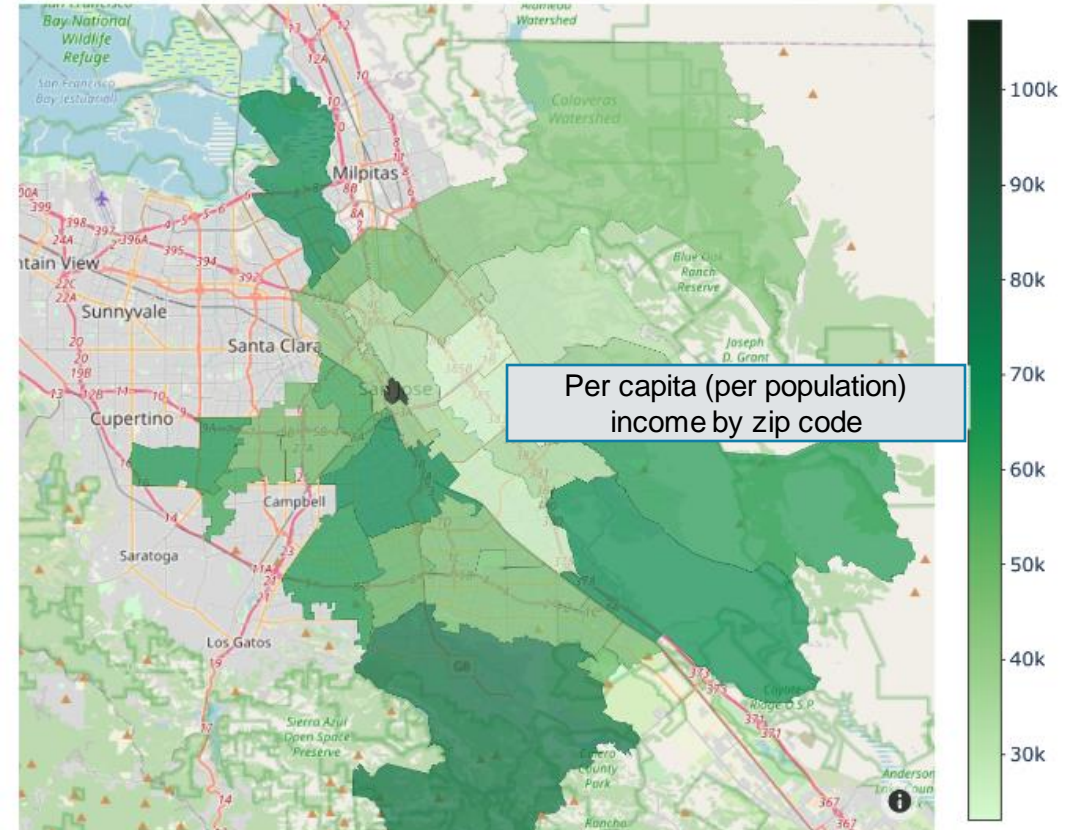

Infrastructure partners

Emergency vehicle average response time (seconds)

Per capita income

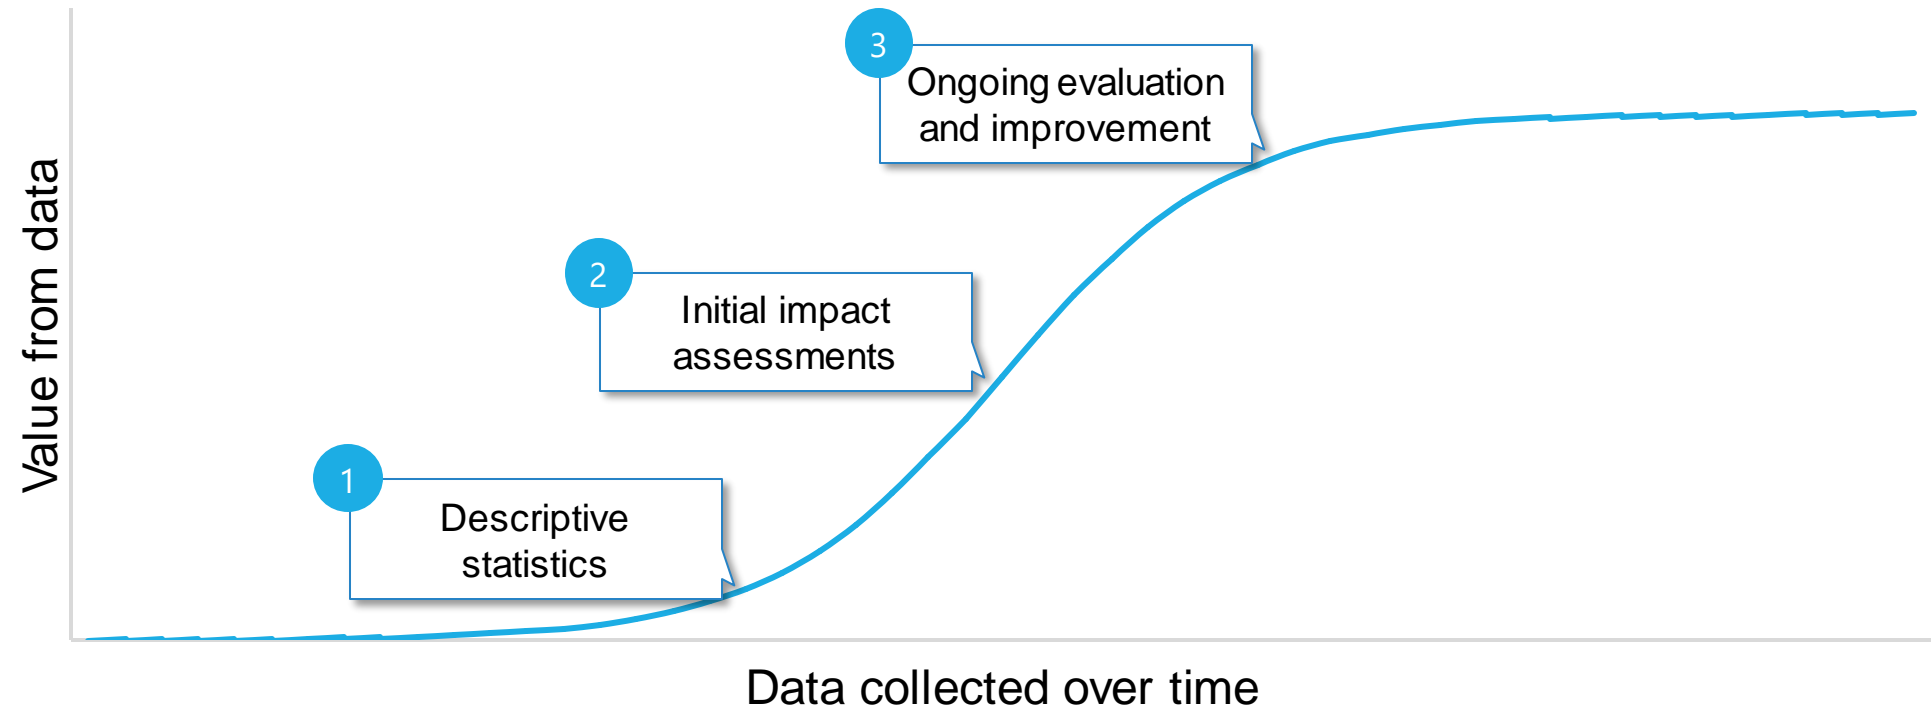

Kudos: Mayor's Office of Technology and Innovation, Data Kind Ambassadors Ramya Ravichandran and Edwin Zhang, City Data Equity Fellow Joy Hsu

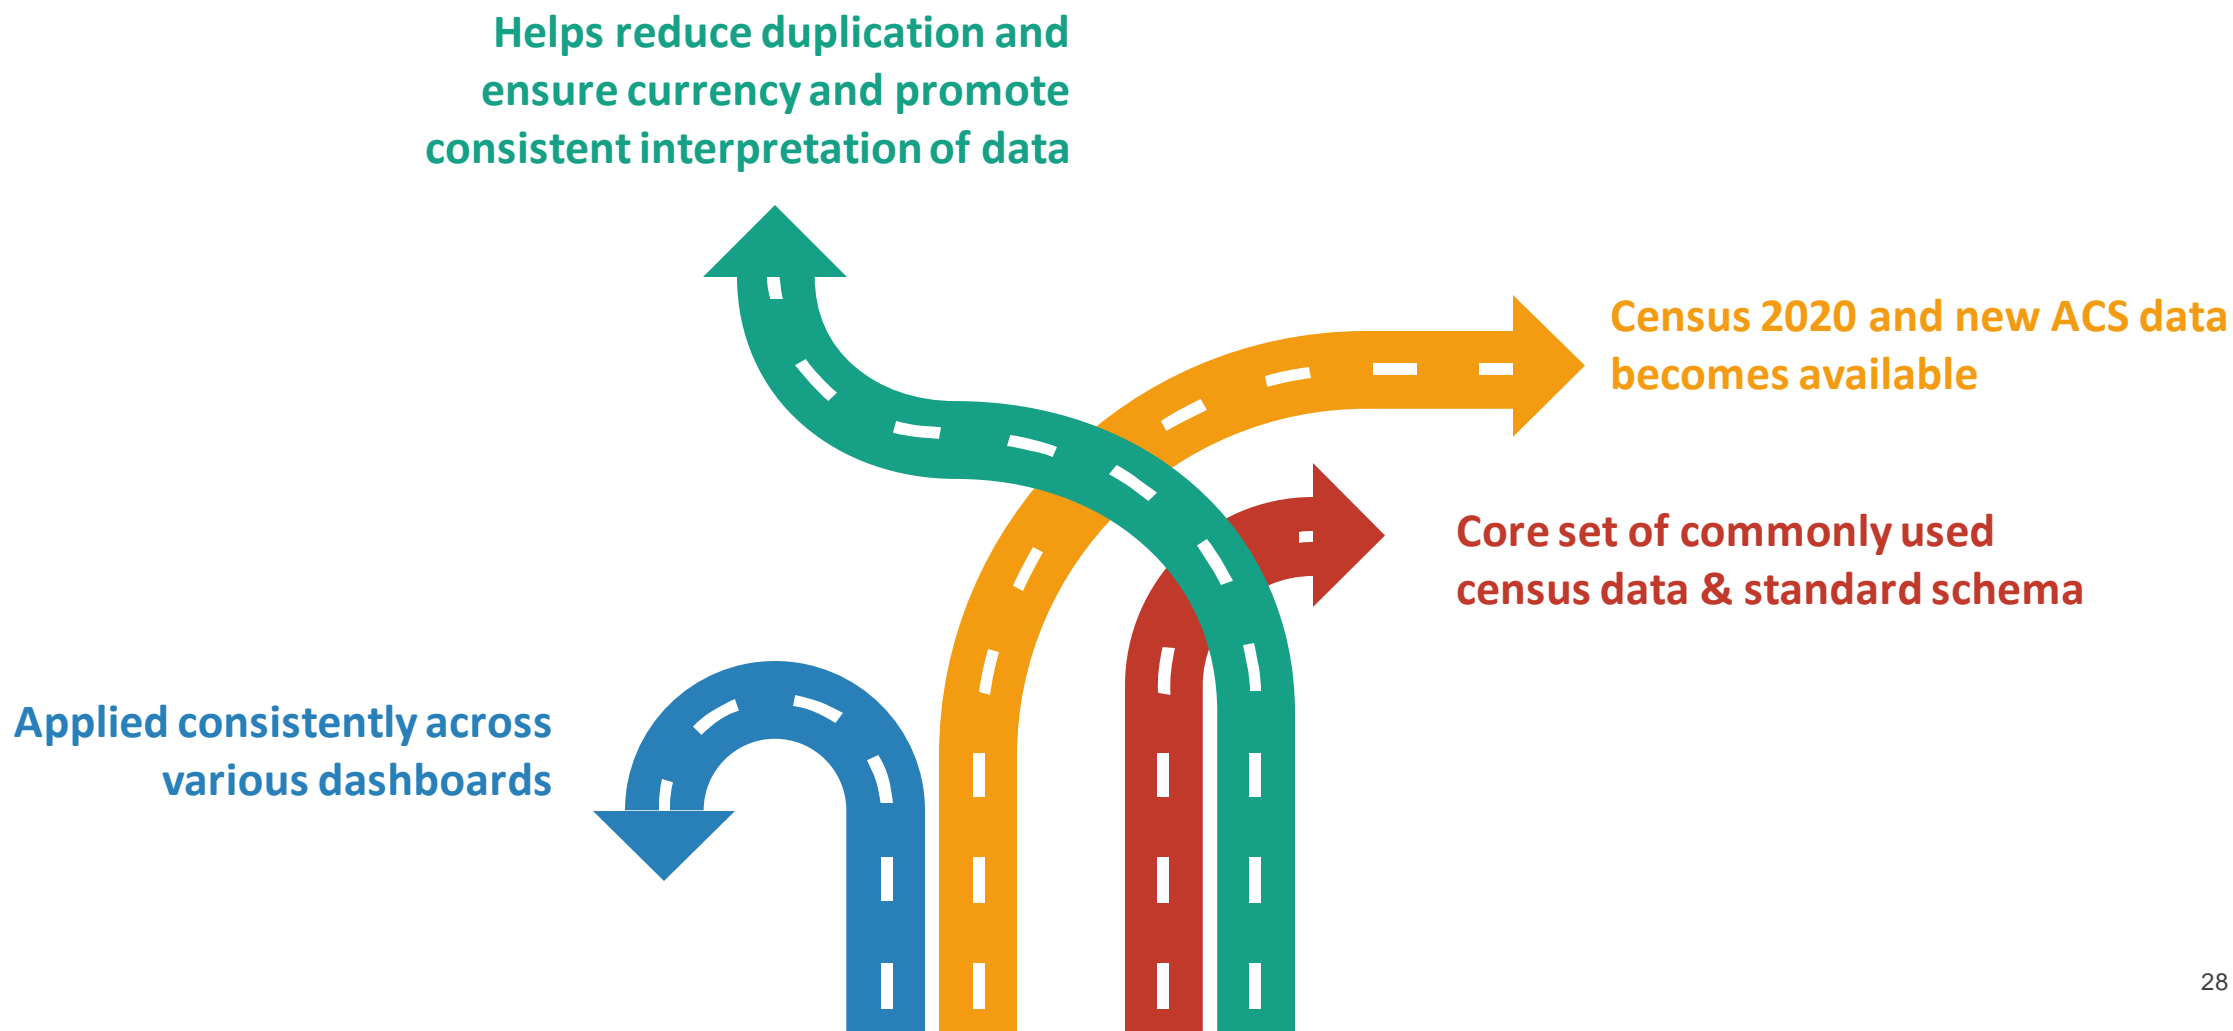

THANK YOU

APPENDIX

MEASURING IMPACT REQUIRES LONG-TERM INVESTMENT

ARCGIS

Real-time and map-centric

Houses Enterprise spatial data repository

Provides robust spatial toolset

TABLEAU

Leverages data and repository built and managed in ArcGIS

Provides many visualizations, including non-spatial

Handles large datasets well, including ability to download extracts
