COUNCIL AGENDA: 08/09/22
FILE: 22-1129
ITEM: 2.14

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Memorandum

TO: HONORABLE MAYOR AND CITY COUNCIL

FROM: John Ristow

SUBJECT: AMENDMENT TO ADA TRANSITION PLAN UPDATE FOR SIDEWALKS

DATE: July 25, 2022

Approved  Date **7/29/2022**

RECOMMENDATION

Adopt a resolution approving the amendment to the Americans with Disabilities Act (ADA) Transition Plan Update for Sidewalks.

OUTCOME

Approval of the amendment to the ADA Transition Plan Update for Sidewalks, hereafter referred to as the "ADA Transition Plan" will formalize prioritization of ADA ramp requests, establish a 2038 target date for citywide remediation of ADA ramps, and ensure the City of San José's (City) compliance with state and federal laws as it relates to ADA curb ramps.

BACKGROUND

The ADA, enacted in 1990, outlines comprehensive rights to persons with disabilities. The ADA is divided into five Titles - most relevant to this amendment is Title II, which prohibits local governments from discriminating against persons with disabilities or from excluding participation in or denying benefits of programs, services, or activities to persons with disabilities. Title II requires that a public entity must evaluate its services, programs, policies, and practices to determine whether they comply with the nondiscrimination regulations of the ADA.

The ADA requires cities to maintain "program accessibility" for persons with disabilities and this may include a variety of programs, activities, and services. Program accessibility for the purpose of this amendment to the transition plan, refers to ADA curb ramps, which provide access to sidewalks to all users. The lack of ADA curb ramps inhibits program accessibility and must be remedied. Accordingly, the ADA requires that all public agencies develop a transition plan for eliminating physical barriers for persons with disabilities.

In 2010, City Council approved an update to sections 9 and 10 of the City's ADA Transition Plan for Sidewalks to reflect the most current understanding of the ADA ramp inventory in the City. Based on the City's curb ramp inventory at the time, approximately 67 percent of the City's curb locations had ramps, for a total of 17,900 ramps, and about 8,900 locations (33 percent) did not have ramps.

In 2014, the Civil Rights Education and Enforcement Center (CREEC) representing Plaintiff, Artie Lashbrook, notified the City of its intent to pursue legal action to ensure citywide ADA accessibility. In 2016, the City and CREEC entered into an interim settlement agreement that included a requirement for the City to re-assess all ADA ramp locations. In 2020, the City and CREEC agreed to a class action settlement, the terms of which were set forth in a Consent Decree approved by the Court. The Consent Decree includes a provision requiring amending the City's ADA Transition Plan sections 9 and 10.

ANALYSIS

In compliance with the 2016 interim settlement agreement, the City entered into a consultant agreement in 2017 to re-assess all ADA ramp locations throughout the city to determine the following:

1) Where ADA ramps were present and fully compliant with the ADA and California Building Code
2) Where ADA ramps were present but non-compliant with the ADA and California Building Code
3) Where ADA ramps should be present, but were missing

The surveying and data collection was completed in 2018. This effort identified about 12,000 intersections in San José and approximately 29,700 curb ramp locations (existing and missing ramps). Staff and CREEC worked together to determine which non-compliant ramps provided the highest barriers to mobility. This resulted in the categorization shown in Table 1 below.

Table 1 – Ramp Categorization and Scheduled Remediation

Category	Construction Completion Target Date	Estimated Number of Curb Ramps (as of 2021)
High Barrier: *Excessive running slope, side flare slopes, cross slopes, landing slopes; non-flush transitions*	2030	10,032
Missing: *No Existing ramp*	2030	4,397
Substandard (Low Barrier): *Moderately large slopes but less than that of High Barrier; missing detectable warnings*	2038	4,533
ADA Compliant: *Meets ADA requirements*	--	10,695
	Total	**29,657**

Examples of these ramp categories are shown in Attachment A. Upon collection and analysis of the data, and a robust annual pavement maintenance program that resulted in the construction or rehabilitation of over 2,000 ADA ramps per year, the City and CREEC entered into an agreement that would result in the remediation of all ADA ramps and an update to the ADA Transition Plan last approved in 2010. The scope of the proposed ADA Transition Plan amendment includes recommendations to ensure the City remediates and constructs all curb ramps by the year 2038. This goal can be achieved if the City's current successful programs building over 2,000 curb ramps a year are continued and if current funding levels are maintained as proposed as part of this plan. Each year, the City allocates at least $12 million for construction of curb ramps along streets receiving pavement maintenance. In addition, the City allocates $1 million to its ADA Sidewalk Accessibility Program to build citizen-requested curb ramps.

Summary of Amendment to the ADA Transition Plan Update for Sidewalks

Further ADA Inventory Development (Section 9)

This section describes the requirement to conduct an inventory of all curb ramp locations in the city and is contained in Attachment B. The ADA ramp data collected and analyzed in 2017-18 represented a significant step forward for the program and fulfilled this initial requirement. The City is procuring and establishing a new asset management system for its curb ramps city-wide which will involve integrating the curb ramp inventory database with a continuously updated GIS database. The new system is tentatively targeted to be in place by the end of fiscal year

2022-23. After this implementation, staff will provide public access to the curb ramp database where users can view existing curb ramp conditions and be notified of future curb ramp construction.

ADA Transition Plan Priorities (Section 10)

Section 10 outlines the methods used to prioritize ADA curb ramp construction and upgrades and is shown in Attachment C. A large proportion of curb ramps being built every year are pre-determined based on the streets that are selected for pavement maintenance per the City's three-year pavement maintenance plan. Every curb ramp along streets planned for pavement maintenance will be installed or upgraded to be ADA-compliant regardless of program access prioritization factors. All other curb ramps are prioritized and built through the ADA Sidewalk Accessibility Program via citizen requests, focusing on serving disabled persons, and occasionally other City initiatives such as safety-related projects. Updated appendices in the ADA Transition Plan include the recent ADA curb ramp request process and ADA curb ramp inspection and acceptance sheet. With more than 2,000 curb ramps constructed annually since 2019, the City is projected to complete all ramp construction ahead of its schedule.

CONCLUSION

The amendment to the ADA Transition Plan demonstrates the City's commitment to ensuring accessible sidewalks for people of all abilities and staff appreciate the collaboration and feedback provided from the members of the community and Plaintiff. The amendment incorporates the prioritization of ADA curb ramp requests, provides an update on the current inventory of the city's curb ramps, and formalizes the City's goal for remediation and construction of all non-compliant curb ramps. The adoption of this amendment also ensures that the City is conforming to the terms of the Consent Decree previously approved by City Council and ordered by the Court. The City will make every effort to provide complete pedestrian right-of-way accessibility on its curb ramps citywide by the year 2038, an aggressive but achievable goal given current and projected funding levels.

EVALUATION AND FOLLOW-UP

Each year, the City will provide a list of ADA ramps to be completed in alignment with the pavement maintenance three-year-plan update on the Department of Transportation public webpage. Additionally, the City will provide a written annual report to Plaintiffs' attorneys regarding the status of the City's compliance with the terms of the consent decree. The annual report will include summary information detailing the number of accessible curb ramps constructed and/or remediated, dollars appropriated and expended for curb ramp construction that year, and the status of pending curb ramp requests.

CLIMATE SMART SAN JOSE

The recommendation in this memorandum aligns with one or more Climate Smart San José energy, water, or mobility goals.

PUBLIC OUTREACH

The City has solicited public comment on the ADA Transition Plan Update for Sidewalks from community members who have mobility disabilities (e.g., disability rights advocate group, Silicon Valley Independent Living Center, Vista Center for the Blind), which included a public outreach event in February 2022. The session was recorded and is available on the Department of Transportation's YouTube channel (https://youtu.be/7lKccWWiaiw), and the link was sent to relevant and interested stakeholders.

COORDINATION

This memorandum has been coordinated with the Department of Public Works, the Department of Planning, Building and Code Enforcement, the City Manager's Budget Office, and the City Attorney's Office.

COMMISSION RECOMMENDATION/INPUT

No commission recommendation or input is associated with this action.

FISCAL/POLICY ALIGNMENT

This project supports the Transportation and Aviation Services City Service Area goal to Preserve and Improve Transportation Assets and Facilities.

COST SUMMARY/IMPLICATIONS

The City's goal is to be at full ADA compliance within a 16-year period, and to complete priority curb ramps – missing, high barrier, and requests from persons with disabilities – within the next eight years. Accomplishing this will require construction and remediation of approximately 2,000 ramps annually at a cost of $13 million each year. Funding is included in the 2023-2027 Adopted Traffic Control Improvement Program with $12 million allocated through the pavement maintenance program and $1 million is funded through the ADA Sidewalk Accessibility Program to build citizen-requested curb ramps. Funding for the remainder of the 16-year period is anticipated to be included in future Traffic Capital Improvement Programs at a similar level.

CEQA

Exempt, File No. PP18-029, CEQA Guidelines Section 15301(c), Existing Facilities.

JOHN RISTOW
Director of Transportation

For questions, please contact Rick Scott, Deputy Director, (408) 794-1925.

Attachment A - Examples of compliant ADA curb ramps
Attachment B - ADA curb ramp inventory requirements
Attachment C - ADA curb ramps priority selection and criteria
Attachment D - Appendices

Examples of compliant ADA curb ramps

ADA Compliant – Fully complies with ADA/CBC

High Barrier – Side flares and running slope out of specification

Substandard (Low Barrier) – Accessible but missing detectable warnings

Missing – No ramp present

9: Further ADA Inventory Development

Over the past several years, the City of San José has undertaken and maintained extensive surveying/inventory process documenting the presence or absence of curb ramps. In 2017, the City hired a consultant to collect curb ramp inventory data and evaluate each ramp throughout the City. The surveying and data collection were completed in 2018. This effort shows approximately 12,000 intersections in the City of San José and approximately 29,700 curb ramp locations (existing and missing ramps).

"Surveying", as used in this section, refers to visiting the location by a trained accessibility "surveyor", and obtaining measurements, dimensions, gradients, and/or other visual determinations as may be appropriate depending on the location. Table 1 lists the public right-of-way data that was collected and analyzed. These surveying efforts have allowed the City to establish a GIS database and mapping system of existing pedestrian facilities within the City of San José, mainly focusing on the presence of curb ramps and conditions at immediate adjacent areas. The data is stored in the City's database in the form of spreadsheets, Google Earth KMZ files, as well as in a GIS database.

Table 1: Curb Ramp Inventory Data

Feature	**Information Collected**
Ramp ID	Unique ID for each curb ramp.
Ramp Location	Street name and cross street including latitude and longitude.
Directional Corner of Intersection	NE, SE, SW and NW. (Note: All corners should be referred to by one of these compass points. If the street is not perfectly aligned north and south, the direction will be assigned within the nearest 45 degrees.)
Ramp Configuration	Parallel, perpendicular, or modified ramp.
Running Slope	Running (main) slope of the curb ramp is the slope that is parallel to the direction of travel in percent.
Cross Slope	Cross slope of the main slope of the curb ramp is the slope that is perpendicular to the direction of travel, in percent.
Flared Side Slope(s)	Whether a side slope or parallel slope is present, and if present, the slope of each sloping side or flare parallel to the street, in percent.

Landing Clear Space	Whether a 48-inch landing clear length is provided at the top of the curb ramp, or at the top of each slope of a parallel curb ramp.
Landing Slope**s**	Running and cross slopes of the landing(s) or transition(s) to the sidewalk, in percent.
Width of Ramp	Width of the curb ramp or pan (bottom landing), in inches. A pan or level landing exists when there is a lack of vertical separation between the sidewalk and the street.
Counter Slope	Slope in percent of the gutter or street transition, in percent.
Bottom Landing Clear Space	Whether a curb ramp has a clear space 48 inches minimum outside active traffic lanes or wholly contained in the marked crosswalk, if applicable.
Detectable Warning Surfaces	Whether detectable warning surfaces with truncated domes are present. If present, the surface size, dome size and spacing, and color meeting ADA requirements.
Flush Transition, or Lip	Whether the transition between the ramp and the crossing is flush, or whether a lip is present at the bottom of the curb ramp that is 1/4" or greater.

The City utilizes the GIS database to make continual updates as curb ramps are inspected, upgraded, and/or constructed. The data have been used to determine what general facilities exist, their basic characteristics, and in the development of ADA Transition Plan priorities and determinations of the need for future inventory efforts.

Currently, the City is procuring and establishing a new asset management system for its curb ramps city-wide. Phase 1 will involve integrating the curb ramp inventory database with the continuously updated GIS database. In addition, the new system will allow for increased efficiency and consistency in data entry and increased accuracy in data summary and analysis. The new system is targeted to be in place by the end of FY22-23. Phase 2 will involve providing public access to the curb ramp database where users can view existing curb ramp conditions and be notified of future curb ramp construction.

10. ADA Transition Plan Priorities

A large proportion of curb ramps being built every year are pre-determined based on the streets that are selected for pavement maintenance per the City's three-year pavement maintenance plan. Because every curb ramp along streets planned for pavement maintenance will be installed or upgraded to be ADA-compliant, there is no prioritization criteria for constructing curb ramps related to pavement projects. However, streets receiving maintenance are prioritized based on various criteria including classification, condition, streets associated with planned safety, bikeway, or other "complete streets" projects, community and City Council office feedback, and equity. All other curb ramps are prioritized and built through the ADA Sidewalk Accessibility Program via citizen requests and occasionally other City initiatives such as safety-related projects involving corner curb extensions (bulb-outs). Private development projects will require new and adjacent infrastructure to comply with ADA standards.

Prioritization Criteria for Citizen Requests

The City of San José operates a program of citizen requests for constructing curb ramps, installing audible signals, and providing other accessibility improvements. Generally, requests for improvements have come from community members with disabilities who wish to access their local residence, shopping areas, medical facilities, bus stops, transportation, and other facilities or areas to accommodate their activities of daily living.

The City's curb ramp request program allows citizens to make requests via email or phone. When requests are received, the Department of Transportation (DOT) prioritizes the requests based on the following priority system with P* being highest priority and P6 being lowest priority:

Highest Priority (P*) – Request Made by Citizen with a Disability

Priority 1 (P1) – City Government Offices and Facilities (including the pedestrian rights of way adjacent to facilities owned or operated by the City, and the paths of travel leading from such adjacent pedestrian rights of way to the primary entrances to such facilities)

Priority 2 (P2) – Transportation Corridors

Priority 3 (P3) – Hospitals, Medical Facilities, Assisted Living Facilities, and Other Similar Facilities

Priority 4 (P4) – Places of Public Accommodation Such as Commercial and Business Zones

Priority 5 (P5) – Facilities Containing Employers

Priority 6 (P6) – Residential

When requests are received, DOT evaluates the location for construction or reconstruction and reviews the entire intersection at which the curb ramp is located for its compliance with the ADA standards and California Building Code. Any existing curb ramp is evaluated for usability and safety with a focus on accessibility in order to determine the usable path of travel through that intersection.

The City of San Jose's curb ramp request process is included in Appendix E.

Methods for Prioritizing Projects within Priority Levels

Current City policies utilize basic considerations and evaluation factors when determining whether a curb is suitable for construction or reconstruction. In the ADA Transition Plan Update for Sidewalks, these factors are referred to as "conditions" because they are based on the physical condition of an existing intersection, corner, or curb ramp. These factors should also be used for consideration when determining the priority of a specific item within a priority group or category list.

The most critical conditions and remedies would be to construct curb ramps at locations where they are missing and to re-construct curb ramps at locations where existing curb ramps have unsafe characteristics. Examples are vertical displacements of curb ramps, excessively steep main or side slopes, or deteriorated surface conditions. These curb ramps are categorized as “high barrier.” New curb ramps also need to be installed at locations where no curb ramp currently exists to provide accessibility to the sidewalk. These curb ramps are called “missing.” Next, existing curb ramps should be reconstructed when they do not meet current federal and state accessibility standards. High barrier and missing curb ramps are of high priority for remediation. Curb ramps that are neither “high barrier” nor “missing” are called “substandard.” Table 2 summarizes the characteristics of each category of curb ramps.

Table 2: Curb Ramp Condition Category

Category	General Characteristics
High Barrier[1]	Excessive running slope, side flare slopes, cross slopes, landing slopes; non-flush transitions
Missing	No existing ramp
Substandard (Low Barrier)[2]	Moderately large slopes but less than that of High Barrier; missing detectable warnings
ADA Compliant	Meets ADA requirements

[1] High barrier ramp locations are characterized by the following:

- Curb ramps with less than 32 inches clear
- Curb ramps with running slopes exceeding 10%
- Curb ramps with cross slopes exceeding 4%

- Curb ramps with non-flush transitions
- Curb ramps with counter slopes exceeding 10%
- Curb ramps with side flare slopes exceeding 12.5% where top landings are provided
- Curb ramps with side flare slopes exceeding 10% where top landings are not provided
- Curb ramps with gaps or vertical edges greater than 1 inch
- Parallel curb ramps with bottom landings that have slopes exceeding 4%
- Parallel curb ramps with top landings that have slopes exceeding 4%
- Parallel curb ramps with top landings that have running slopes exceeding 10%
- Curb ramps with a combination of non-compliant running slopes, counter slopes, and non-flush transitions.

[2] Criteria for those curb ramps and related facilities that are out of compliance, but not posing a great need for quick reconstruction, include one or more of the following:

- Main slopes greater than 8.3%, but less than 10%.
- Side flared slopes greater than 10%, but less than 12%, where top landings are provided.
- Pan or landing cross-slopes greater than 2%, but less than 3.5%.
- Gutter slopes greater than 5%, but less than 10%.
- Detectable warning surfaces missing.
- Curb ramp lips not flush, but less than 1/2".

In reviewing the priorities for reconstructing existing curb ramps, criteria that separate existing curb ramps that pose a real barrier or safety hazard from those that are slightly out of specification are made on a case-by-case basis by the DOT ADA curb ramp program manager. All these types of non-compliant curb ramps are on the list of ADA-required work, but those curb ramps that could function well for most persons with disabilities are not prioritized.

When a corner has one existing curb ramp serving more than one path of travel or crosswalk, the City may replace that single curb ramp with two directional curb ramps (ramps aligned in the direction of pedestrian travel) at the same corner, so as long that traffic controls allow for a safe path of travel. The construction of direction ramps shall not be prioritized over locations that are of high priority. . This policy would most likely apply only to corners at intersections on arterial or thoroughfare streets, and it would most likely not apply to signalized locations on major streets for which the geometry of the

intersection makes it impossible to install an 8-phase signal operation, or for residential or local commercial uses.

At some locations, physical or site constraints, or unique terrain may make installation of an additional curb ramp technically infeasible or structurally impracticable. When a curb ramp is technically infeasible or structurally impracticable to construct, the City shall construct the ramp to meet federal and state accessibility standards to the maximum extent possible, and shall use alternative curb ramp designs in order to address physical or site constraints. These locations shall be recorded in the City's curb ramp database.

Implementation Plan

The City has set an aggressive goal to complete construction and remediation of all non-compliant curb ramp locations by 2038, with High Barrier and Missing ramp locations to be completed by 2030 as summarized in Table 3 below.

Category	**Construction Completion Target Date**	**Estimated Number of Curb Ramps (as of 2021)**
High Barrier	2030	10,032
Missing	2030	4,397
Substandard (Low Barrier)	2038	4,533
ADA Compliant	--	10,695
	Total	**29,657**

With more than 2,000 curb ramps constructed annually since 2019, the City is projected to complete all ramp construction ahead of its schedule.

Each year, the City allocates $1 million to its ADA Sidewalk Accessibility Program to build citizen-requested curb ramps. In addition, the City allocates $13,000,000 each year for construction of curb ramps along streets receiving pavement maintenance.

Planned ADA curb ramp construction list can be found in Appendix H.

Appendix A: City of San José Draft ADA Ramp Needs Study

City of San José curb ramp inventory can be provided upon request.

Appendix E: ADA Curb Ramp Request Process

ADA Curb Ramp Request Application: https://www.sanjoseca.gov/your-government/departments-offices/transportation/streets/sidewalks-curb-ramps/curb-ramps-gutters/ada-curb-ramp-request-application

Phone: (408) 794-6463

Step 1: Upon receipt of a ramp request through the web application form responses sent to email (curbramp.request@sanjoseca.gov) or by phone, determine if the request is made by or on behalf of a person with a mobility disability. If so, confirm receipt of the request withing 10 days.

Step 2: Check the Pavement Inspection App and 3-Year Plan to see if a ramp has been constructed or is planned to be constructed.
Pavement Inspection App:
If there is no ramp icon at the intersection location, then continue with the ramp request process. If there is a ramp icon at the location, the color will indicate the following:

- Green – compliant ramp
- Blue – quantified ramp
- Grey – to be constructed ramp
- Red – non-compliant ramp

Check if the ramp is assigned to a project and contact the requestor to inform them that their ramp request will be constructed as part of another project. Give an estimated time as to when the ramp will be constructed within 30 days.

Step 3: Identify the priority of the request.
Priority of ramps (Highest to lowest):

Highest Priority (P*) – Request Made by Citizen with a Disability (120-day turnaround)
Priority 1 (P1) – City Government Offices and Facilities
Priority 2 (P2) – Transportation Corridors
Priority 3 (P3) – Hospitals, Medical Facilities, Assisted Living Facilities, and Other Similar Facilities
Priority 4 (P4) – Places of Public Accommodation Such as Commercial and Business Zones
Priority 5 (P5) – Facilities Containing Employers
Priority 6 (P6) – Residential

Requests with the highest priority will be addressed in the order received unless it is already planned as part of another project.

Step 4: Input information in the ADA Ramp Request Log spreadsheet.
The following information will be recorded for each request:

1) Date Received
2) Ramp Location

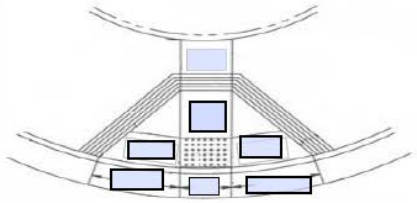

3) Ramp Corner Direction (if an intersection is given, all corners will have ramps constructed)
4) Council District
5) Requestor Name, Address, Contact Information
6) Priority
7) Project Name Assigned
8) Estimated Ramp Installation Date
9) Verified or Completed Date
10) Requestor Notified of Ramp Status/Installation

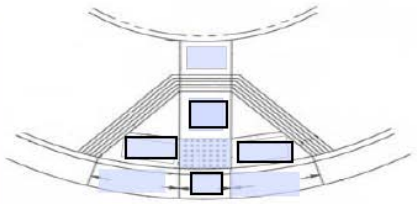

Step 5: Follow up with the requestor to inform them that their request has been inputted into a queue of pending ramp requests and provide an estimated date for ramp installation. If a request cannot be fulfilled by that date, notify the requestor with an updated estimated date.

Appendix F: City of San José Curb Ramp Inspection Form

To be filled out for every ramp constructed in City right-of-way.
This form should be completed within ten days of curb ramp construction.

Compliance with Standards:

All curb ramps should comply with City's current design and construction standards. Where it is infeasible to construct or reconstruct a curb ramp to current standards, the Engineer or Inspector must take note of the non-compliance element(s) in the form by stating what they are and the reason for the non-compliance. After completing the form, submit it for acceptance.

Appendix H: City of San José Planned Ramp Construction

Future ramp construction updates will be made on the Department of Transportation (DOT) public website (https://www.sanjoseca.gov/your-government/departments/transportation/roads/sidewalks-curb-ramps/curb-ramps-gutters) in alignment with the pavement maintenance three-year plan.

The following ramp locations are planned for construction in 2022.
