Dear Mayor and City Council Members,

I'm writing to support updates to the reach code that will expand EV charging for residents of multi-family buildings.

Residents who do not have EV charging access at home need to go elsewhere to charge, and oftentimes the spaces are occupied or not functional. Charging access at home provides reassuring consistency and ease that will make EV adoption and ownership more appealing. As a resident of a nearby community and speaking from personal experience as a renter with an EV but no charging access in our multi-family building, I look forward to the city of San Jose taking this step to make charging more accessible to its residents.

Thank you.

Linh Dan Do

Menlo Park resident

Subject: Reach Code Item 6.1

Dear Honorable Mayor and Honorable Councilmembers;

I see that Chris Burton requested this item to be deferred until April 25th.

This is in good response to the feedback he received from many in the development community last week.

I support the deferral and request a study session of the Reach Code “in toto” so that the actual impacts and costs and wastefulness can be address property.

As you know, The Reach Code was initially passed during the Covid Lockdown Protocol period and many, if not most, did not have meaningful means to understand the implication of the Code.

Having said that, I believe that we (the San Jose development community) will have positive and meaningful thoughts that could make the code more logical, less wasteful and more affordable.

Kindest Regards,

Dennis

Dennis L. Randall, Jr.
