Customer Service Charter

[Website](#)

Department-wide written commitment to provide excellent customer service.

Vision

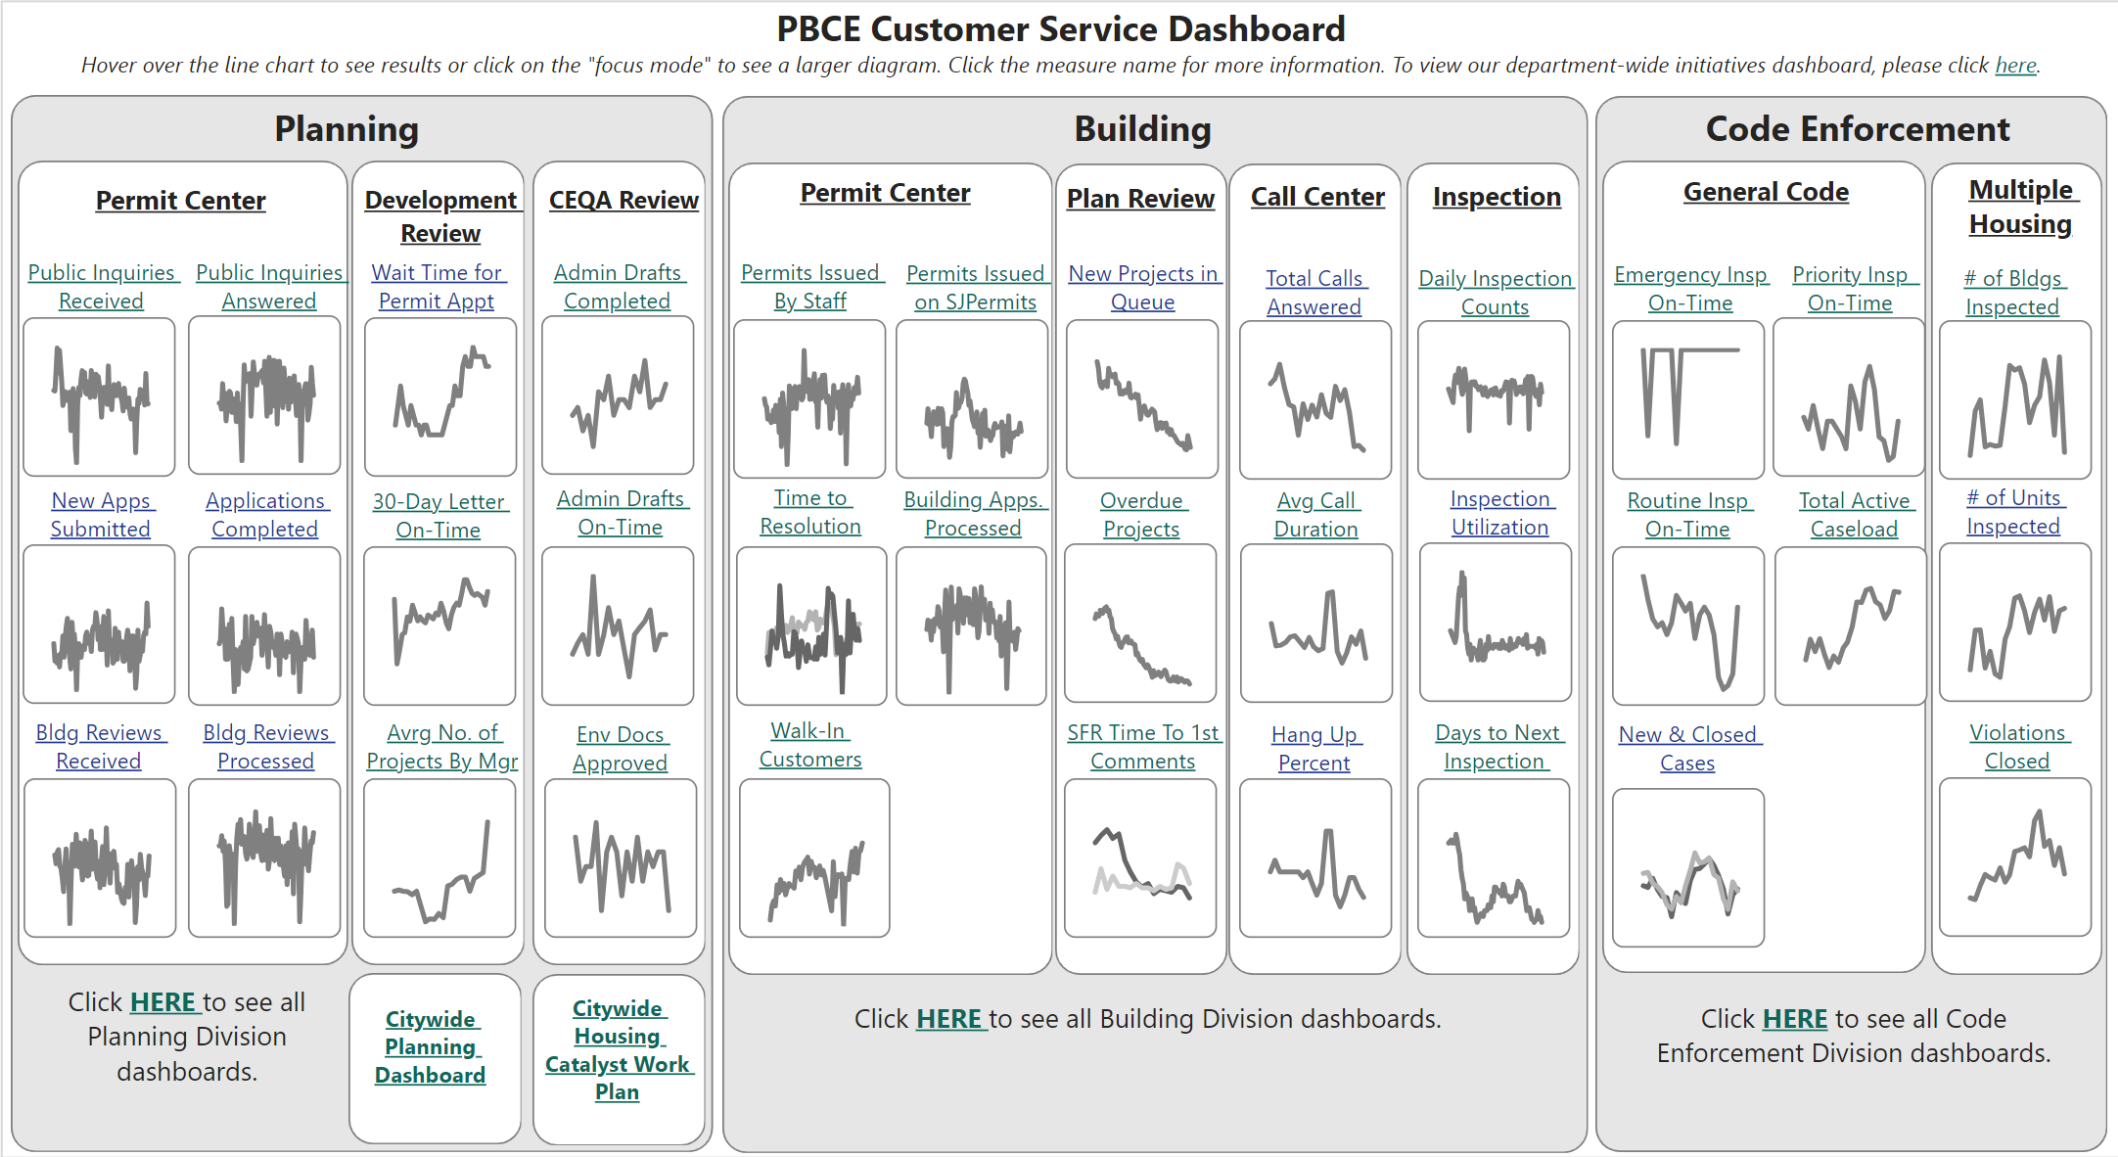

PBCE has a public Charter that details the services, metrics, and resources that actively guides all staff in PBCE in the ongoing pursuit to provide excellent customer service.

Purpose

The Charter should help organize department's goals to make informed management decisions to make meaningful strides towards our goal to be an excellent public service organization.

Number of Project Applications in Review Per Project Manager

PBCE Dashboard

Planning Dashboard

Measure Definition		Applications In Queue	Summary																				
This metric illustrates the number of project applications currently in review per Project Manager on the Planning Development Review team.		40.5 3/3/2024	The metric illustrates the caseload of each project manager. The metric is a vital tool to consider, as a higher number may lead to less productivity in terms of meeting timelines. Additionally, increased caseloads reduce the department's ability to implement new process improvements, provide training, respond to non-project inquiries and other non-project duties. This project caseload is an average. Given the different complexity of projects and experiences, some planners may have more or less than the average. Additionally, this number does not consider non-discretionary projects or preliminary reviews, as those projects work on a different timeline and are at different levels of complexity. This measure helps justify budget allocation by showing the workload during busy periods, which is crucial for efficient resource management and budget planning.

Average Review Cycle for Completed Projects

PBCE Dashboard

Planning Dashboard

Measure Definition

This metric illustrates the average number of review cycles required for to complete a discretionary Planning entitlement projects.

Average Review Cycle

2.45

3/3/2024

Summary

The following metric demonstrates the average amount of review cycles (submittal and resubmittals) required for completed projects that typically go to public hearings. It assesses how efficiently the Development Review Planner and review partners review and provide comments and feedback to project applicants. A lower number of average review cycles typically indicates staff has provided clear and correctable comments to project applicants. Monitoring this metric helps us identify bottlenecks, inefficiencies, and areas for improvement in the review process, allowing our team to enhance productivity.

Goal Description: The objective is to optimize our development review process by reducing the average review cycles per project to 2 or fewer. Acknowledging that the development review process is tied to various dependencies like building plan review, stakeholder ability to high quality resubmittals, and project complexity is essential. These dependencies frequently impact the efficiency of our reviews.

Goal/Standard

2.5 Cycles

Disruptions

General Impacts

- Sufficient Planners to process plans/projects on time and adjust to the volume of projects.
- Staffing- Staff absences and time off.
- Delays in comments or reviews by other departments may lead to delays in Planning development reviews.
- Changes in application requirements
- Software, applications, and or changes to the submittals or resubmittals programs.

[Average Review Cycles for Completed Projects](#)

Most Building permit plan review applications now started on SJPermits.org with customers uploading their files to SJePlans.

**Launched
Oct 2023!**

Implementation has:

- Reduced time for permit intake (25 days to 4 days)
- Streamlined plan coordination between applicants & departments
- Given applicants better insights into their place in the application/review process

Due to new process improvement, old measures were removed, and new ones created.

Applications Processed

How many Building permit application are accepted by the Permit Center

Applications Processed

Measure Definition

This measure tracks the number of new permit applications that are processed by the Building permit center team every week including those applications processed through SJePlans.

Operation

Permit Center

Measure Type

Activity

Summary

All Building permits start with the initial submittal (either through SJePlans or directly by Permit Center staff) that triggers the creation of a permit record ("folder"). Projects that require plan review are processed then routed to the plan review team and the required Divisions/Development Services partners. While most permit are issued online, larger permits that require plans must start through the permit center. This measure indicates the overall capacity of the team to start the process for Building permits.

Goal Description

The goal of 200 intakes per week measure the overall capacity of the team to start the process for Building Permits.

Owner

Maysoon Dahi

Goal/Standard

200/week

Disruptions

- December 26, 2022- **Holiday Closure:** Decrease in applications processed due to City holiday closure.
- October 30th, 2023- **SJePlans Launch:** Since launching the electronic plan review system, manual intakes have transitioned to a Self-Start process.
- 2021-2022: **High Vacancy:** High vacancy rate within the permit center staffing.
- COVID-19: **Pandemic:** The Pandemic moved the permit center into a fully virtual operation.

General Impacts

- Holidays – Holiday closure
- Offering Overtime to staff
- System / Network is down
- Applicants not prepared for submittal
- Staffing resources

Operation

Permit Center

Measure Type

Outcome

Summary

This measure shows time to resolution in hours taken to resolve(building online permit) inquiries that were submitted by customers either through email (to buildingpermits@sanjoseca.gov, adu.ally@sanjoseca.gov, and onlinepermits@sanjoseca.gov) or by submitting a ticket through our SJePERMITS [Freshdesk function](#). The majority of online inquiries relate to scheduling appointments, permit applications, permit status updates, and many other inquiries.

Goal Description

The goal of 48 hours only applies to the measure of resolution time. If resolution time surpasses 48 hours it's an indicator that our customer success team may be receiving a substantial influx of inquiries, which includes both walk-in customers and online submissions. When resolution time falls below 48 hours, it suggests that our customer success team is effectively resolving inquiries, or it might

PBCE Customer Service Charter- Initiatives

The Department is committed to improving on the measures included as part of the Customer Service Charter. There are many ongoing initiatives that are categorized

- **Status** - Defines if the initiative is currently being worked on (In-Progress), has not been started (Backlog), has been completed (Completed) or if it has been launched and continues to be utilized in our process (Completed-Ongoing).
- **Impact** - Categorizes the magnitude of the impact of the measure. High impact will be immediately and significantly noticed by customers. Low impact will indirectly impact customers in a more subtle way.
- **Effort** - Categorizes the time, resources and staff required to complete each initiative.

Division Initiative Counts

Planning	Building	Code
33	24	26

Use filters/dropdowns to refine your search.

Filter By: Status & Type

- ☐ Partly Implemented/In-Progr...
- ☐ Not Implemented
- ☐ Completed - Ongoing
- ☐ Completed
- ☐ Backlog

Improvement Type	Title And/OR Recommendation #	Description	Est. Date	Status	Effort	Impact
Improvement Initiative	Program EIRs for Urban Villages and Area Plans	Complete EIRs for Urban Villages and area plans so future applications may complete addendums as opposed to full EIRs.		Partly Implemented/In-Progress	High	High
Improvement Initiative	Public Information/Customer Service Enhancements	Updating Planning's key online assets—webpages, applications, and documents—to ensure accurate, reliable information that aligns with current practices and requirements. This initiative aims to provide our staff and customers with a consistently improved online experience.	Ongoing	Partly Implemented/In-Progress	Medium	Medium
Improvement Initiative	Recruitment Tracker	The recruitment tracker collects data regarding past and current recruitments within PBCE. The tracker helps us track how long each step of the recruitment process takes and also shows us how well each of our hiring managers performs.	Completed - 03/07/22	Completed - Ongoing	Low	Low
Audit Recommendation	Residential Building Permits	To improve the process for assigning projects to Plan Review staff or consultants, Planning, Building and Code Enforcement should: a. Develop a process to assign projects to appropriate staff in a timely manner. b. Clarify which types of projects should be reviewed by inspectors and track the timeliness of completing reviews for first comments and resubmittals. c. Standardize the process for assignment of projects among staff for plan review.		Partly Implemented/In-Progress	Medium	High
Audit Recommendation	Residential Building Permits 23-07 #01	To ensure the Planning, Building and Code Enforcement's staffing plan accurately considers Building's ongoing staffing challenges, the Department should develop a long-term staffing strategy that: a. Expands its recruiting efforts by bolstering advertising for specific positions,	June 2024	Not Implemented	Medium	High
