RECOMMENDATION

Continue item 10.3 to the next available land use evening meeting agenda, scheduled for October 23rd.

BACKGROUND

I appreciate the Council's previous support on continuing this item to ensure that a robust community process can occur. The additional time has been put to good use – as can be seen in the Planning Department's supplemental memo.

However, that supplemental memo includes 30 pages of responses to technical questions, and was released just before the close of business yesterday. The purpose of the continuance was to improve the process for community feedback, and 24 hours is simply insufficient time for our community to review a lengthy report.

I respectfully ask my colleagues to provide our community, the applicant, and my office the additional time needed to review this update and finish the collaborative process, which I have been leading with the additional time that the Council has provided.
