Re: Displacement of Local Family Owned Businesses.

During the past few years, the Alum Rock Business Corridor suffered very serious adverse impact caused by VTA's Bus Rapid Transit (BRT) construction. As a result of the different complications caused by the project during those years, over 20 local family owned small businesses closed. Now, after a year of the completion of the BRT system, the Alum Rock Business Corridor has become very attractive to developers wanting to build multi-unit housing along the corridor thus creating an opportunity for advanced displacement and gentrification.

As we all know, the lack of affordable housing and real estate prices have created a housing crisis. This housing crisis in the City of San José requires building as many homes as possible, especially affordable housing. We as local family-owned businesses understand this because, as stated, we are local, we do business, and we also live in this city. Therefore we also require a place to live as well as a space to do business at.

At this present time, several projects to build multi-unit housing along Alum Rock are being proposed. Some of those developers already bought the parcels and are already filing permits for their developments. There is a big problem, **each and every one of these new developments will be directly displacing local family-owned businesses. Currently the developments plan to** demolish the old buildings presently occupied by these small businesses which are mostly minority-owned. Second, once built, the commercial spaces available will most likely not be affordable to these local businesses and will be occupied by chain stores and corporations able to afford the new rent prices. Thus causing not only the displacement of these small businesses but also endangering the preservation of the cultural character and/or "flavor" of the corridor.

For instance, three proposed developments will be displacing over 30 small businesses altogether. None of these developments has provided a plan for how they will be supporting or helping relocate those businesses. We must understand, each one of these businesses has an owner and a family. Each one of these businesses has an average of at least two employees who also have families. **Therefore, these three developments will not only be displacing 30 small businesses but potentially leaving 90 families without a job.**

Another issue is the integration of commercial space (storefront) when building affordable housing. And, as we all know our biggest need is for affordable housing, but then again we must understand that by bringing affordable housing without commercial requirements to our business corridor we are virtually converting Commercial Zoning to Residential Zoning.

Therefore, we are seeking policies and regulations that can counteract these effects and enable all of our business community to remain within our urban villages. As business owners, we understand the great need for new housing units. We understand the need because we live in this community and also face the effects of rising rents. We must come together to protect our small businesses and families from displacement. At this time, we are seeking policies and programs that can provide:

1. Accesses to affordable commercial or retail space with long-term leases.
2. Relocation grants for those who are displaced
3. Protecting those culturally serving businesses.
4. Preserving the cultural character and/or "flavor" of the corridor.
5. Request space for local family-owned businesses in new developments.
6. Requiring developers to give displaced businesses the opportunity to go in front of the line to reoccupy the commercial spaces when finished at a fair market cost.
7. Rent subsidy for property owners if they can agree to at least 10-year leases with a rent increase cap.

Displacement is a serious issue on the Alum Rock business corridor with the development of BRT, the second phase of BART and the increased economic development. Cities throughout the nation are facing similar challenges. At this precise time, there is a bill that has been introduced in the New York City Council -The Small Business Jobs Survival Act (SBJSJ- Int. 0737-A) that would give commercial tenants rights. The Institute for Local Self-Reliance (www.ilsr.org) has done research called: "How Rising Commercial Rents Are Threatening Independent Businesses, and What Cities Are Doing About It." And there are many other entities already working on these issues. We must do something urgent here in our city. Currently, we support any Anti-Displacement efforts to stave off the loss of our family-owned businesses and look forward to working with the City to address our urgent needs.

Respectfully,

Jesus Flores
