re: 11/27/18 Agenda item 4.6 -- Land swap for widening of Branham Lane

People are already complaining about "speedsters" along that strip -- why compound that problem with giving them more lanes.

Besides, not saying it never exists, but I have never seen any traffic back-up in that area.

I urge "no" on this.

Thank you,
Rick Shrum

I am completely supportive of this land swap. In fact, I wish there was a land swap for Snell avenue as well. Almaden Expy , Monterrey Rd. and Snell are the only three roads with direct access to Blossom Valley. The narrow lanes and the curves in Snell, along the park, are a traffic hazard. Cars driving **southbound are constantly cutting the lanes, because they don't see the sharp curve. It would be a great** improvement to both roads, creating a much safer drive around the park.

Thank you for trying to improve the safety of our roads,

Scott Beaumont
