Please state why you want to become a member of this Board or Commission including specific objectives which you would work toward as a member. If you are applying for the Board of Fair Campaign and Political Practices, please indicate any familiarity or experience you may have with campaign laws.

As an Electrical Industry expert, I believe my background meshes well with the work this commission is trying to accomplish. It is imperative we move towards a cleaner energy infrastructure. My experience in the field could rapidly help the City continue to move in that direction. The lack of training for many in the electrical field causes more waste, and energy usage inefficiencies. Since I am coming from the construction side, I have insights on the practicality of building, and how to streamline many processes for efficiency purposes.

☒ Yes ☐ No

Please describe your experience in serving on a Commission or Board.

Considering your experience and activities in business, labor, professional, social, or other organizations, indicate the experience, training, knowledge and/or skills which qualify you for appointment to the selected commission(s).

I am a graduate of a State-approved Electrical Apprenticeship program, here in Santa Clara County. I now teach at the same institution. I have been in the Electrical industry for 8 years, serving in many capacities. I have worked in the construction side, as well as the business side doing service estimating.

What is your understanding of the purpose of the Commission?

The Commission provides feedback and input on the development of strategy and operating principles or models, informs the prioritization and development of energy programs, identifies areas of concern as well as innovative opportunities for reducing carbon emissions, monitors best practices of other Community Choice Energy programs, legislative and regulatory issues, and new energy developments, and be liaisons to the community for purposes of advocacy and outreach.

Please list three issues facing the City that you feel the Commission should address.

1. Addressing the use of an lower skilled and under trained workforce, and how it effects energy efficiencies. 2. Understanding the practical applications of municipalization. 3. Upgrade of energy grid, and the use of commercial battery storage back-up systems
