

Attachment A

Costar definitions for Building Class:

Class A: In general, a class A building is an extremely desirable investment-grade property with the highest quality construction and workmanship, materials and systems, significant architectural features, the highest quality/expensive finish and trim, abundant amenities, first rate maintenance and management; usually occupied by prestigious tenants with above average rental rates and in an excellent location with exceptional accessibility. It may have been built within the last 5-10 years, but if it is older, it has been renovated to maintain its status and provide it many amenities.

Class B: In general, a class B building offers more utilitarian space without special attractions. It will typically have ordinary architectural design and structural features, with average interior finish, systems, and floor plans, adequate systems and overall condition. It will typically not have the abundant amenities and location that a class A building will have.

Class C: In general, a class C building is a no-frills, older building that offers basic space. The property has below-average maintenance and management, a mixed or low tenant prestige, and inferior elevators and mechanical/electrical systems.

Class C: In general, a class C building is a no-frills, older building that offers basic space. The property has below-average maintenance and management, a mixed or low tenant prestige, and inferior elevators and mechanical/electrical systems.

Class F: A functionally or economically obsolete building is one that does not offer a viable alternative for space and does not "compete" with others of similar type for occupancy by businesses seeking a location for operations. These buildings will usually have externally visible physical or structural features as well as internal ones that render it undesirable to be leased and therefore not competitive with any other properties in the market. The property may even be tagged as "Condemned" by the local authorities.
