**Subject:** Blair Beekman. June 2, 2020. sj. city council agenda. Item 2.12.

Dear community of San Jose, and city govt,

I hope everybody is noticing, the amount of broadband & Vision Zero-like technology, on recent, local city council agendas.

There are at least, 3 items, on the June 2nd council agenda, related to technology issues, including, Item 3.4, Measure T needs, and Item 7.1, Graffiti abatement issues,

Consent Calendar, item 2.12, is agreements, with a company, called Smartwave, that offers, many varied uses, of tech.& wi-fi, including rodent traps.

It should be an important reminder, how this project, can interconnect, with new downtown geo-fencing.

Geo-fencing, is an ambitious project, of data collectiing, surveillance,, monitoring, and other applications.

This is all, a part of, an IoT future, that I hope, San Jose City government, is contiinuly learning, how to prepare, more open & accountable, public policies.

As these are, the better ways, to define, positive sustainability, equality, equity, & innovation, for a local, u. s. community democracy.

It is these good practices, at the local level, that can eventually organize, and make for reasonable asks & demands, at the national & intl. level

sincerely,  
blair beekman
