Subject: Blair Beekman-2. June 2, 2020. sj council agenda. Item 3.4.

Dear community of San Jose, and city govt.,

To continue, with the importance, of Measure T, public oversight issues, of item 3.4.

I hope, San Jose city govt., really knows, how to take to heart, practice, facilitate, and openly describe, with the everyday community,

the important ideas, of responsibility, limitation, and minimal use practices, with local technology, at this time.

It is time, to more seriously consider, that minimal use, of broadband and tech. practices, can accomplish, about as much, at this time, as oversaturation of tech., in local neighborhoods

The point of community meetings, this summer in s.j., is how shared communication, can create better planning, and help all sides, better work together.

As an entire community, we need to start to consider, how to legally ask, the federal govt., to formally stop, their massive, war-like push of technology, at this time.

And to try, to return decision making & control, to the local community level.

As it is the local community, that is more sensitive & knowledgeable, of its tech issues.

Sincerely,
Blair Beekman

Subject: Blair Beekman-1. June 2, 2020. sj. city council agenda. Item 3.4.

Dear community of San Jose, city govt,

With item 3.4, I again ask, to please consider, how to expand, Measure T public oversight.

Or to make clear, what can be, an organized, structured, community meeting/commission process, this summer.

Good communication, can be of much help, for everyday community & local sj govt, to talk about technology, housing, education, the economy, along with other issues.

And how we can all, better plan & prepare, for Covid-19 issues, from the fall of 2019, into the summer of 2021.

Sincerely,

Blair Beekman
