Blair Beekman. Monday, June 15, 2020. _____ CPUC. PG&E. Technology Accountability

b. beekman <[REDACTED]>

Mon 6/15/2020 9:40 AM

[External Email]

A letter mailed, to CPUC board persons, last week. Also sent to people, of local s.f. bay area govts.

Dear Cpuc,

This is my first time addressing, the Cpuc.

I may lack a certain depth, of knowledge. But I have been trying to follow, a hopeful, transition period, in Northern California.

As for decades now, many good people, have been patiently studying, how to create a decent future, with humanistic ideas & studies, towards positive, sustainable, local community energy practices.

Meanwhile, for the last several, PG&E, seems to have focused, on a new level, of economic infrastructure building & development, with controlled fire use.

It has felt like a harbinger, if not the impetus itself, for the current, world wide Covid-19 pandemic.

It is this sort of work & thinking, that invariably leads to, unstable, unpeaceful, and disorganized, policy decision making.

This letter is to write, there are now guidelines, examples, and Ca. state legal precedents, in how to help organize, better oversight and communication, between govt. & community.

It can ask for an end, to u.s. continual war, and it's shock doctrine.

And that can address, social planning, social engineering, and infrastructure building, that use the large corporate models, of disaster capitalism.

In 2014, the s.f. bay area, began a process, for more, open, accountable, and responsible practices, with technology, surveillance, and data collection, in local communities.

The ACLU Surveillance and Technology Ordinance, is a part of a series, of guidelines, studies, and legal precedents, from the ACLU, the state of California, and the UN, among others.

It is how good civil rights & civil protection practices, can help everyday people & their local govt., work towards, more open and shared practices.

Interestingly, its efforts, towards, peace, shared oversight, and open, democratic practices, can bring organization, efficiency, consensus building, and an enjoyment in learning, for all sides.

These are the ideas, of decent minded, long-term stability.

There are the ideas, of positive sustainability, consensus building and good communication, between a community and its govt.

And that can allow ourselves, better choices, in how to work out of and leave, the incredibly unstable ways, of shock doctrine, disaster capitalism practices.

I hope the CPUC, and PG&E, can review, good accountability ideas, guidelines, examples, and legal precedents, this summer.

And realize, that at this time, there are important choices, in how to organize, our better human principles & ideals.

And in how, to better balance the questions, of long term, positive sustainability, for everyday people, their community, their local govt., and life on this planet.

These are, a set of ideas & practices, that are intended to work with, everyday people, their communities, and their local govt.

From this, a natural, collective care, at the local level, is meant to develop, a more decent reasoning, from national leaders.

That can then begin, to better respect, life on this planet, overall.

Sincerely,
Blair Beekman

[External Email]

Dear community of San Jose, and city govt.,

To speak to city budget issues.

While I fully agree, with the need to bridge, the digital divide. And with some ideas, of digital inclusion.

The ideas of more open and responsible, surveillance & data collection practices, and overall minimal use policies - simply has to become, a more regular dialogue, in the future of tech. in San Jose.

These are the ideas, of how open & transparent, local democratic practices, can address, and look for ways - to end, u.s. continual war, and its shock doctrine, disaster capitalism.

Better tech accountability practices, at the local level, across the country, at this time, can help open up, many important concepts, including, human rights, civil protections, and the initial idealism, of equity and equality.

It is becoming clear, the ideas of equity, can offer, a positive focus, for the community, and a good roadmap, in how decisions can be made, for a now, Covid-19 city budget, in the next few years.

As both everyday people and local government are worried, in the health risks and environmental changes we will be going through, with a massive Federal push, of broadband and vision zero technology at this time..

Dear community of San Jose, city govt,

In the 100 ways, that important, ideas & changes, to SJPd, can be addressed, at this time, there can also be, a countless number of issues, that will need to be addressed, as well.

I hope, we can all have patience, an open mind, and can be positive - in how to address, both small & large changes, from the sjpd, city govt., and community, in the next few years.

sincerely,
blair beekman

[External Email]

Dear community of San Jose, and city govt.,

There is a level of dialogue, around state and federal govt., at this time, that can address, rent forgiveness issues, for both, owners & tenants, in open and positive terms.

I feel, this current level of dialogue, can keep people, from all sides, out of harm & danger.

It is words and ideas, are meant to help avoid, rash and impatient decision making.

To help avoid confusion, it is up to ourselves, to have open, good dialogue, in the better ideals, of the CARES act, & Heroes act.

Interestingly, this how we can raise ourselves, as a whole community effort, toward our better human nature, in an obvious time of need.

As I personally feel, most tenants & owners, did not have a part, in the planning, of this pandemic - they should not have to be stuck, with its debt burden.

sincerely,
blair beekman

Dear community of San Jose, and city govt.,

I feel, it can be, better, public policies, at the local level, across the country, at this time, that can be, an important factor,

in how to help open up, many important concepts, positive democratic practices, communication, and long-term community sustainability,

Good, open dialogue, and connections, between the many parts, of a local community and its city government.

And to study & respect, early, beginning, initial ideas of equity, can offer, a positive focus, and many concepts, of a good community future.

As the city govt. of San Jose, study of equity, the past few years, can help provide, good decision making & direction, for a budget, with Covid-19 related issues, for the next few years.

Please review, councilperson Peralez, better spoken, good words, on this subject, during a mid-March 2020, council meeting.

Councilperson Davis, also offered interesting comment, during the same meeting.

She thanked the mayor, for the ideas of deficit reduction, to be an important way, to address the budget, for the next few years.

sincerely,
blair beekman

[External Email]

Dear community of San Jose, and city govt,

I hope you can work, to line up the SJPd, to the new, city of San Jose mask policy, in Item 2.2, today.

In all of the years, of possible, pre Covid-19 planning, by the SJPd.

And that may be related to, the current presidential administration,

The SJPd reasoning - reported in local newspapers, to keep their masks off, in order to be prepared for more protests -

may actually speak to, the very ideas of insensitivity & disconnect, that will need to addressed, in the next few months & years.

sincerely,
blair beekman

Thank you for the attempts, to better clarify, the county example, with the sj mask ordinance.
