Re: Re: San Jose Commercial Linkage Fee

Dear Rachel VanderVeen,

Dear San Jose City Staff,

I am writing to voice my strong support for the highest feasible Commercial Linkage Fee in San Jose. The recently released Fee Feasibility Study confirms that the city can collect robust fees for affordable housing and still move forward with its ambitious plans for new job-related development.

We are sensitive to the fact that these are not simple times, and that the pandemic is likely to impact the feasibility of some commercial development, particularly hotels and some types of retail. However, it is clear that, for most projects, the CLF will not be the deciding factor and that development activity will pick up over time.

San Jose and its neighbors faced an affordable housing emergency before this current health and economic crisis, and the need for more affordable housing will increase as the City moves to recover. New commercial development creates a pressing need for more housing for new employees. The Nexus study confirmed that many employees do not, and will not, get paid enough to afford to live in San Jose without a measurable increase in the number of new affordable homes.

Commercial Linkage Fees are a standard tool for generating local resources for affordable housing development, and the fee ranges outlined in the feasibility study are in line with other cities in the County that have already adopted this funding source. As it faces unprecedented growth over the next 5-15 years, San Jose cannot afford to continue to fall deeper behind in addressing the housing needs of its lower- and moderate-income residents.

It is the responsibility of the City to ensure that we have the resources to respond to this additional need. We urge you to take full advantage of the CLF as part of the solution.

Sincerely,

Zazi Villarreal

Dear Clerk City Clerk,

The City Council should not be considering a tax on new commercial construction, which could cost us thousands of good-paying middle class jobs that would benefit our community. This might have been feasible before COVID-19, but we are now in the middle of a dire economic recession caused by the pandemic. We need to stay focused on bringing middle class jobs back to the city instead.

The City released a development feasibility study that is deeply flawed. Even the consultants admitted that their economic assumptions were based off data from BEFORE the pandemic. It is wrong for the city to use a flawed analysis with outdated assumptions to enact a new tax. The entire nexus study and feasibility analysis should be completely rejected.

Now is not the right time to be taxing new jobs. Please vote NO on the commercial linkage fee.

I don't live in San Jose and I don't want other close localities to raise or implement new taxes either

Sincerely,

Roxane Mortensen

How can an informed decision be made by our City Officials based on pre-pandemic data? In the commercial construction world, we are trying to SURVIVE first, THEN recover. Please consider this within the proper and current context. Adding more taxes and fees to ANY construction right now is going to, simply put, kill deals and NOTHING will get done.

Thank you for your re-consideration.

Sincerely,

Tony Miranda

Re: Re: San Jose Commercial Linkage Fee

Dear Nanci Klein,

Dear San Jose City Staff,

I am writing to voice my strong support for the highest feasible Commercial Linkage Fee in San Jose. The recently released Fee Feasibility Study confirms that the city can collect robust fees for

affordable housing and still move forward with its ambitious plans for new job-related development.

We are sensitive to the fact that these are not simple times, and that the pandemic is likely to impact the feasibility of some commercial development, particularly hotels and some types of retail. However, it is clear that, for most projects, the CLF will not be the deciding factor and that development activity will pick up over time.

San Jose and its neighbors faced an affordable housing emergency before this current health and economic crisis, and the need for more affordable housing will increase as the City moves to recover. New commercial development creates a pressing need for more housing for new employees. The Nexus study confirmed that many employees do not, and will not, get paid enough to afford to live in San Jose without a measurable increase in the number of new affordable homes.

Commercial Linkage Fees are a standard tool for generating local resources for affordable housing development, and the fee ranges outlined in the feasibility study are in line with other cities in the County that have already adopted this funding source. As it faces unprecedented growth over the next 5-15 years, San Jose cannot afford to continue to fall deeper behind in addressing the housing needs of its lower- and moderate-income residents.

It is the responsibility of the City to ensure that we have the resources to respond to this additional need. We urge you to take full advantage of the CLF as part of the solution.

Sincerely,  
Anna Ponce

[External Email]

Re: Fund Affordable Housing: Pass the HIghest Feasible Commercial Linkage Fee

Dear Jacky Morales-Ferrand,

Dear San Jose City Staff,

Commercial Linkage Fees are a standard tool for generating local resources for affordable housing development, and the fee ranges outlined in the feasibility study are in line with other cities in the County that have already adopted this funding source. As it faces unprecedented growth over the next 5-15 years, San Jose cannot afford to continue to fall deeper behind in addressing the housing needs of its lower- and moderate-income residents.

I am writing to voice my strong support for the highest feasible Commercial Linkage Fee in San Jose. The recently released Fee Feasibility Study confirms that the city can collect robust fees for affordable housing and still move forward with its ambitious plans for new job-related development.

We are sensitive to the fact that these are not simple times, and that the pandemic is likely to impact the feasibility of some commercial development, particularly hotels and some types of retail. However, it is clear

that, for most projects, the CLF will not be the deciding factor and that development activity will pick up over time.

San Jose and its neighbors faced an affordable housing emergency before this current health and economic crisis, and the need for more affordable housing will increase as the City moves to recover. New commercial development creates a pressing need for more housing for new employees. The Nexus study confirmed that many employees do not, and will not, get paid enough to afford to live in San Jose without a measurable increase in the number of new affordable homes.

It is the responsibility of the City to ensure that we have the resources to respond to this additional need. We urge you to take full advantage of the CLF as part of the solution.

Sincerely,

Jody Chang
