Subject: RE: PSFSS 4-15-2021 Fireworks Ordinance Workplan Status Report
Date: Tuesday, April 13, 2021 9:54:54 AM

[External Email]

My written public comment regarding the Fireworks Workplan Status Report :

I strongly encourage the PSFSS Committee adopt the Fireworks workplan with special emphasis on the following items:

- 6) Evaluate the use of drones as an enforcement tool
- 7) Compare fines across the Bay Area and bring proposed increased fine amounts
- 10) Evaluate potential funding for reinstatement of the Fireworks Hotspot Enforcement Pilot for July 4, 2021

With special emphasis on these two items:

- 8) *Collaborate with County, State, and federal partners on legislation to ban the use of fireworks and increase the punishment for violators. Engage with neighboring cities such as Morgan Hill and Gilroy to encourage countywide bans and prevent fireworks sold and used in these cities from entering San Jose.*
- 9) *Search for potential state and federal funding sources to invest in enforcement mechanisms and programs to deter fireworks use*

It is obvious to me as a long time advocate against the illegal use of fireworks in our city, that the only way to truly put a dent in the dangerous use of fireworks is to partner with other Bay Area municipalities along with State and Federal agencies to get at the SOURCE.

Quite frankly, it is too little and too late to depend on law enforcement to stop the illegal fireworks on the 4th of July (or New Years, or Super Bowl, etc). I believe the only way to mitigate this activity is to go after the suppliers and that means months ahead of time.

I am pleading with you.

Don't let what happened in Ontario, California earlier this year, happen in San Jose.

I want to add my support to this plan, with a reminder that without enforcement we won't have an impact. The weak link is the police. If they targeted sales and hot spots we would have so much more success. I also encourage the plan adopting drones for locating problem spots, resulting in quicker responses and follow up with citations.

I support the social host ordinance as well.

There is a large community of people who continue to demand more action regarding fireworks. With the increasing severity of fires, including urban fires, and this years drought it is ever more imperative that the City take action.

At the end of the memo it says: "The recommendation in this memo has no effect on Climate Smart San Jose energy, water, or mobility goals." I beg to differ. While I'm not exactly sure what Climate Smart San Jose is I want to reiterate what I've been saying for years. Fireworks cause a tremendous amount of both air and water pollution. So in my view there is a huge impact on NOT enforcing a zero tolerance fireworks policy.

Thank you for your continued support on this very critical subject,
Suzanne Morrone

All,
I just want to state that I strongly agree with the position that Suzanne Morrone has taken below. Increased fire danger alone should be reason enough to make changes and improve compliance with the City's rules.
