# Investment Policy Statement on Investment Fees

“The Plan will seek alignment of interests when negotiating fees while pursuing the best net of fees performance results. Investment costs shall be monitored, controlled, and whenever possible negotiated to ensure cost effectiveness. The Board shall give consideration to the impact of administrative expenses, external management fees and performance fees when establishing the asset mix policy of the Plan. The Board will be provided reports on investment costs of the Plan at least annually.”

# Understanding Total Expense Ratio

- Complex topic
- Declining return expectations → Increased focus
  - $\text{Net returns} = \text{Gross returns} - \text{Total expense ratio}$
- A function of asset allocation and asset class structuring
  - Higher complexity = higher fees
- ORS comprehensive annual fee reporting started 2015
  - Includes embedded or unobserved fees/expenses (e.g., fees not reported on statements)
  - Few public plans have comprehensive fee reporting (CalPERS, CalSTRS, LACERA, OCERS)
  - No public-sector standard methodology for comprehensive fee reporting
- Complies with California Government Code §7514.7

# Understanding Total Expense Ratio

Net returns = Gross returns – Total expense ratio

Fee type	Description	Examples
<b>Management fees</b>	Fees paid to investment management firms	
<b>Incentive fees</b>	Performance-based fees paid to investment management firms	
<b>Operating expenses</b>	Costs of administering individual investment vehicles	Audit, tax, legal, custodian
<b>Other expenses</b>	Costs incurred at the plan level	Staff salaries and benefits, consultants, third party vendors

# Glossary of Terms

- Active strategies: Funds that attempt to outperform an index
- Asset allocation: Distribution of assets across a number of asset classes that each exhibit a unique combination of risk and expected return. Asset allocation is the most important determinant of long-term plan performance
- Hedged strategies: Investments that generally seek to achieve a return regardless of market direction
- Gross returns: Returns before the deduction of expenses
- Incentive fees: Performance-based fees paid to individual investment management firms. Incentive fees are a form of shared economics. Also known as “carried interest”
- Management fees: Asset-based fees paid to individual investment management firms
- Net returns: Returns after the deduction of management fees, incentive fees, and operating expenses
- Operating expenses: Costs of administering individual investment vehicles (not the retirement plans)
- Other expenses: Costs incurred at the plan level (staff, consultants, third party vendors, etc.)
- Passive strategies: Investments that intend to match the return of an index
- Private strategies: Investments in illiquid assets such as privately held companies or real estate
- Total expense ratio: Total expenses (sum of management fees, incentive fees, and operating expenses) divided by average plan assets

# Asset Allocation Considerations

<sup>1</sup> Expected return assumptions for 1) Bonds equals the yield of the ten-year Treasury plus 100 basis points, and 2) Equities equals the dividend yield plus the earnings yield of the S&P 500 index (using the inflation-adjusted trailing 10-year earnings). Probability calculation is for the subsequent ten years.
