WHEREAS, the Constitution of the United States of America affords certain protections to the ownership of firearms; and

WHEREAS, the United States Supreme Court has recognized that the Constitutional protections related to firearms ownership are not unlimited, and can be subject to certain types of governmental regulations; and

WHEREAS, a city's police power includes the power to regulate firearms and many courts throughout the nation have upheld local regulations related to the ownership or possession of firearms; and

WHEREAS, firearm injuries have a significant adverse public health and safety impact nationally, in the State of California, and locally; and

WHEREAS, each year more than 23,000 United States residents die by firearm suicide, 14,000 die by firearm homicide, and nearly 500 die from unintentional firearm injuries; and

WHEREAS, in California, between 2005 and 2015, nearly 4,000 children and teenagers were killed or injured with firearms, and 533 children and teenagers committed suicide with firearms, according to data from the Center for Disease Control and Prevention; and

WHEREAS, the Santa Clara County Public Health Department issued a report on firearm injuries in April 2018. In 2016, 11% of injury deaths were due to firearms injuries. During the period 2007-2016, there were an average of 46 deaths per year due to self-inflicted/suicide from firearms injuries, and an average of 28 deaths per year due to assault/homicide from firearms injuries. Self-inflicted/suicide accounted for the highest percentage of deaths (59%) from firearms injuries, with assault/homicide accounting for 36% of deaths from firearm injuries; and

WHEREAS, the April 2018 Santa Clara County Public Health Department report on firearm injuries reported that during the period from 2010-2014, there were an annual average of 28 emergency department visits and 12 hospitalizations due to unintentional firearms injuries. During 2010-2014, 31% of emergency department visits and 16% of hospitalizations from firearms injuries were due to unintentional shootings; and

WHEREAS, research published in the American Journal of Epidemiology in 2004 found that regardless of storage practice, type of gun, or number of firearms in the home, having a gun in the home was associated with an increased risk of firearm homicide and firearm suicide in the home; and

WHEREAS, a 2014 review in the Annals of Internal Medicine suggests that access to firearms within the home doubles the risk that family members will become a victim of homicide, and triples the risk of suicide; and

WHEREAS, a study in the New England Journal of Medicine in 2020 found that handgun ownership is associated with eight times greater likelihood for firearm suicide among men, and 35 times greater likelihood of firearm suicide among women; and

WHEREAS, according to the American Academy of Pediatrics, in homes with guns, suicide rates in children and adolescents and the likelihood of accidental death by shooting are each four times higher than in homes without guns; and

WHEREAS, in the past decade, 40% of the suicides committed by children and teens involved guns, and 90% of these suicides were with guns that the victims accessed at their own homes or from a relative's home; and

WHEREAS, 58% of shooting deaths in children and teens are homicides, and the risk of homicide is three times higher when there are guns in the home; and

WHEREAS, a June 2014 report published by Everytown for Gun Safety and Moms Demand Action which analyzed publicly reported gun deaths nation-wide over a one-year period from December 15, 2012 to December 12, 2013, showed that at least 100 children were killed in unintentional shootings, amounting to nearly two each week; and

WHEREAS, according to research published in Social Science and Medicine in 2007 based on data over a three-year study period from 2001 to 2003, states with higher rates of household firearm ownership had higher rates of firearm homicide but not of non-firearm homicide, and this relationship held across gender, age, income and multiple other variables; and

WHEREAS, a study in the Journal of Urban Health conducted in 2015 estimated there are as many as 4.6 million children in the United States living in homes with loaded unsecured guns; and

WHEREAS, injuries from unintentional shootings, which are generally insurable, comprise more than a third of all gun-related injuries nationally; and

WHEREAS, in some instances, gun owners have been successfully sued for harm resulting from the use of the owner's firearm by themselves or a third party; and

WHEREAS, auto insurers have used risk-adjusted premiums to reward good driving and incentivize use of airbags and other safety features, and by using a comprehensive public health approach to car safety the United States reduced per-mile auto fatalities by nearly 80% from 1967 to 2017; and

WHEREAS, similarly, insurance-based mechanisms can encourage firearm owners to take safety classes, use gun safes, install trigger locks, or utilize chamber-load indicators, and according to 2018 research published in The Actuary there is evidence that some actuaries and insurance companies are recognizing firearm-related risk through their product offerings, pricing and underwriting decisions; and

WHEREAS, pursuant to the provisions and requirements of the California Environmental Quality Act of 1970, together with related State CEQA Guidelines and Title 21 of the San José Municipal Code (collectively, "CEQA"), the Director of Planning, Building and Code Enforcement has determined that the provisions of this Ordinance do not constitute a project, under File No. PP17-008 (General Procedure & Policy Making resulting in no changes to the physical environment); and

WHEREAS, the City Council of the City of San José is the decision-making body for this Ordinance; and

WHEREAS, this Council has reviewed and considered the "not a project" determination under CEQA prior to taking any approval actions on this Ordinance;

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF SAN JOSE:
