

Memorandum

TO: HONORABLE MAYOR
AND CITY COUNCIL

FROM: Lori Mitchell

SUBJECT: 2023 RATES AND
SJ CARES EXPANSION

DATE: April 10, 2023

Approved

Date

4/17/23

RECOMMENDATION

Adopt a resolution to:

- (a) Establish San José Clean Energy rates, inclusive of the Power Charge Indifference Adjustment and Franchise Fee Surcharge, for GreenSource, TotalGreen, and SJ Cares according to the rate schedule set forth in Attachments A, B, and C, effective May 15, 2023.
- (b) Expand the SJ Cares program, which is open to San José Clean Energy customers eligible for California Alternate Rates for Energy or Family Electric Rate Assistance, to include customers on non-residential rates, according to the rate schedule set forth in Attachment C, effective May 15, 2023.

SUMMARY AND OUTCOME

Approving the resolutions will result in San José Clean Energy (SJCE) offering the options and electric generation rates set forth in the rate schedule in Attachments A, B, and C of this memorandum, effective May 15, 2023. All SJCE generation charges will be one to three percent below Pacific Gas and Electric Company's (PG&E) bundled generation charges, inclusive of the Power Charge Indifference Adjustment (PCIA) and Franchise Fee Surcharge, depending on SJCE customer class and usage.

Additionally, approving the expansion of SJ Cares as proposed will expand access to additional customers who meet the existing California Alternate Rates for Energy (CARE) and Family Electric Rate Assistance (FERA) enrollment eligibility criteria but may have previously been overlooked due to their classification as a commercial customer. The additional engagement with community-based and non-profit organizations that currently administer income-based assistance programs will increase awareness of CARE and FERA and services offered by SJCE resulting in more eligible SJCE customers receiving the 10 percent SJ Cares discount.

BACKGROUND

Rates

On November 7, 2017, the San José City Council (City Council) approved an ordinance to add Title 26 to the San José Municipal Code that provides procedures for the operation and management of SJCE by the Community Energy Department (Department). Under Title 26 of the San José Municipal Code, SJCE may provide rate designs or programs as approved by the City Council.

On November 6, 2018, the City Council approved a resolution authorizing the Department to set SJCE rates for the GreenSource service at one percent below PG&E's generation rates, after accounting for all PG&E added fees, including the Franchise Fee Surcharge and the PCIA, across all rate classes for 2019.

On November 17, 2020, the City Council approved a resolution requiring the Department to establish a power mix of at least 40 percent renewable energy for the GreenSource service and to set GreenSource rates at 0.25 percent below PG&E's generation rates, after accounting for all PG&E added fees, including the PCIA and Franchise Fee Surcharge, across all rate classes for 2021. The City Council also approved flexibility to vary the rate discount to SJCE customers between zero percent and one percent below PG&E's generation rates.

On May 11, 2021, the City Council approved a resolution authorizing the Department to establish a third SJCE service, called GreenValue, with rates set at parity with PG&E and a power mix of at least 36 percent renewable energy and 80 percent carbon-free energy. The City Council also approved a resolution that established the SJ Cares program, which allowed CARE and FERA customers enrolled in GreenSource service to pay GreenValue rates. Finally, the City Council approved a resolution adjusting rates for SJCE's GreenSource service to eight percent above PG&E's standard rates, after accounting for the PCIA and Franchise Fee Surcharge across all rate classes and setting the power mix for GreenSource at 55 percent renewable energy and at least 80 percent carbon-free energy.

On June 22, 2021, the City Council authorized the City of San José Financing Authority to issue no more than \$95 million in commercial paper notes to SJCE to finance power purchases and other operating costs. The City Council also approved the second amendment to the revolving credit agreement with Barclays Bank PLC and related budget actions. The City Council directed staff return to the Transportation and Environment Committee in the fall of 2022 with a report on the business plan and the outlook for SJCE.

On December 6, 2021, the Transportation and Environment Committee accepted a report including SJCE's Strategic Framework Plan for 2023 to 2025, which outlines strategies for SJCE to strengthen financial resiliency, including the adoption of a cost-of-service ratemaking methodology.

On December 14, 2021, the Department presented two sets of recommendations to the City Council regarding its 2022 power mix and rates. This approach was necessary to manage a potential delay in PG&E's rate-setting process.

1. Plan A: If there was no delay in PG&E's rate-setting process, the Department recommended amending SJCE service options as follows, beginning January 1, 2022:
 - a. Increase the renewable energy content for SJCE's GreenSource service to 60 percent and continue to set rates at eight percent above PG&E's generation rates after accounting for the PCIA and the Franchise Fee Surcharge;
 - b. Increase the renewable content for SJCE's GreenValue service to 40 percent and continue to set rates at parity to PG&E's generation rates after accounting for the PCIA and the Franchise Fee Surcharge;
 - c. Continue to set rates for SJCE's TotalGreen service (100 percent renewable energy service) at \$0.005 or \$0.01 per kilowatt-hour (kWh) above GreenSource, depending on rate class; and
 - d. Provide an extra five percent discount off GreenValue rates to customers enrolled in the SJ Cares program.

2. Plan B: If there was a delay in PG&E's rate-setting process, the Department recommended amending SJCE service options as follows beginning January 1, 2022, provided that the Department adopt Plan A as soon as practically reasonable after PG&E's implementation of rate and PCIA changes:
 - a. Increase the renewable energy content for SJCE's GreenSource service to 60 percent and set rates at 30 percent above PG&E generation rates after accounting for the PCIA and Franchise Fee Surcharge;
 - b. Increase the renewable content for SJCE's GreenValue service to 40 percent and continue to set rates at parity with PG&E's generation rates after accounting for the PCIA and Franchise Fee Surcharge;
 - c. Continue to set rates for SJCE's TotalGreen service (100 percent renewable energy service) at \$0.005 or \$0.01 per kWh above GreenSource, depending on rate class; and
 - d. Continue to set rates for the SJ Cares program at parity with PG&E's generation rates after accounting for the PCIA and Franchise Fee Surcharge.

On January 1, 2022, the Department implemented Plan B described above due to delays in PG&E's rate-setting process.

On March 1, 2022, the Department adopted Plan A described above upon PG&E's rate and PCIA changes taking effect.

On June 28, 2022, the City Council approved a resolution to modify Plan A of the 2022 rates in response to June 1, 2022, changes in rates by PG&E. The City Council established the ceiling for percentage difference of GreenSource over PG&E's generation rates to be no more than eight percent, as well as the floor for percentage difference of GreenValue and SJ Cares to be no less than parity or five percent below PG&E's generation rates, respectively. The amendment left

SJCE rates unchanged for any customer classes for which PG&E's generation rates were increasing and lowered rates for customer classes for which PG&E's generation rates were decreasing as of June 1, 2022. Section 26.40.020 of the San José Municipal Code allows the Department to decrease SJCE rates without providing written notice to customers.

On November 7, 2022, the Transportation and Environment Committee accepted a summary report of SJCE's cost-of-service study. A recommendation to adopt the cost-of-service rate setting methodology was recommended in the Transportation and Environment Committee December 2021 report.

2023 Rates

On December 6, 2022, the City Council approved SJCE's rates for 2023 based on a cost-of-service methodology. At that time, PG&E's rates and PCIA for 2023 had not been finalized. On December 29, 2022, PG&E submitted Advice Letter number 6805-E with its final rates and fees, effective January 1, 2023.¹ This filing included the final PCIA, incorporating the approved methodology from the California Public Utility Commission's December 15, 2022 decision.²

On February 27, 2023, PG&E submitted Supplemental Advice Letter number 6863-E with its final rates and fees, effective March 1, 2023.³ The results of this rate change were an overall customer bill increase of 4.4 percent with that increase primarily occurring on the transmission and delivery portion of the bill. PG&E bundled generation rates were essentially unaffected.

SJ Cares

On May 11, 2021, the City Council approved establishing SJCE's SJ Cares program for CARE and FERA customers. The program offered CARE and FERA customers more renewable energy at SJCE's lowest rates.

On December 14, 2021, the City Council approved setting rates for SJ Cares five percent below PG&E's rates, inclusive of the PCIA and Franchise Fee Surcharge.

On December 6, 2022, the City Council approved setting rates for SJ Cares 10 percent below SJCE's GreenSource rates.

Approximately 75,000 SJCE customers are enrolled in SJ Cares, and to date, have saved more than \$6 million since the program began in 2021.

ANALYSIS

2023 Rates

The final PG&E bundled generation rates, PCIA, and Franchise Fee Surcharge, as of March 1, 2023, are summarized in Table 1 below:

Table 1: Summary of PG&E Bundled Generation Rates, PCIA, and Franchise Fee Surcharge

Rate Group	PG&E Bundled Generation Rate* (\$/kWh)	PG&E Added Fees (\$/kWh)	
		PCIA (2018 Vintage**)	Franchise Fee Surcharge
Residential	0.15614	0.00263	0.00111
Small Commercial	0.14919	0.00252	0.00106
Medium Commercial	0.15729	0.00265	0.00113
Large Commercial	0.14774	0.00249	0.00106
Streetlights	0.12737	0.00216	0.00091
Standby	0.10871	0.00185	0.00078
Agriculture	0.13931	0.00234	0.00099
Traffic Control	0.13813	0.00252	0.00106
Industrial (B-20T)	0.12849	0.00238	0.00088
Industrial (B-20P)	0.13549	0.00229	0.00096
Industrial (B-20S)	0.14086	0.00215	0.00099

*inclusive of Bundled PCIA

**most SJCE customers are 2018 PCIA vintage, since SJCE’s main launch was in February 2019

Overall, PG&E’s January 1, 2023 rate change raised generation rates approximately 2.5 percent across all rates, slightly more than expected. The PCIA was reduced significantly from 2022, as expected. The majority of SJCE’s GreenSource charges are now one to three percent below PG&E, inclusive of the PCIA and Franchise Fee Surcharge, depending on customer class and usage.

Following PG&E’s rate change, 21 out of 90 SJCE tariffs have one or more rate components that are more expensive than SJCE’s corresponding rate component that is targeted to be one to three percent below PG&E’s bundled generation charges. There are approximately 10,000 customers, which is less than three percent of SJCE’s total customer count, on these tariffs. Of these customers, 90 percent are on EV-2, which currently has charges 0.3 percent higher than PG&E’s bundled generation rate. SJCE’s rates were set prior to receiving final PG&E rates, creating this discrepancy. The Department recommends setting rates, inclusive of the PCIA and Franchise Fee Surcharge, for GreenSource and TotalGreen, according to the rate schedule in Attachments A and B, effective May 15, 2023, to achieve charges that are 1-3 percent below PG&E setting rates, inclusive of the PCIA and Franchise Fee Surcharge, across all tariffs.

Since the memorandum for the December 6, 2022 City Council meeting was posted, PG&E launched a new residential Electric Home rate as an option for customers with electric vehicles, energy storage, or an electric heat pump for water heating or climate control. SJCE added a corresponding rate to its rate sheets in Attachments A, B, and C.

SJ Cares Expansion

The State CARE program provides a monthly on-bill discount of 30-35 percent on electricity and participants qualify through income guidelines or if enrolled in certain public assistance programs.⁴ The State FERA program provides a monthly on-bill discount of 18 percent on electricity for households of three or more that qualify through income guidelines.⁵ Customers apply for these state-funded programs through PG&E and receive the same discount with SJCE as they would if they receive full electricity service from PG&E.

SJCE's SJ Cares program offers an extra 10 percent discount on SJCE's charges to customers enrolled in CARE or FERA. Currently, the SJ Cares discount is extended only to qualifying customers on residential rates. Staff identified 38 customer accounts enrolled in the CARE or FERA program on commercial rates. These customers primarily consist of nonprofit supportive housing and other uses that qualify for CARE or FERA,⁶ but are not currently receiving the extra 10 percent discount through SJ Cares. The Department recommends extending the SJ Cares discount to all customers that qualify for CARE or FERA, including those on commercial rates. Since each account serves multiple residents, the recommendation would benefit hundreds of residents.

Staff will conduct outreach to increase awareness of the CARE and FERA programs among nonprofit group living facilities and sub-metered residential facilities such as mobile home parks. Increasing enrollment in CARE and FERA means SJCE can easily offer the SJ Cares discount to more customers in San José.

SJCE is exploring additional pathways to easily enroll customers who receive public assistance into SJ Cares. Staff is meeting with Santa Clara County agencies, the City's Housing Department, and Destination: Home to identify groups of SJCE customers who receive public assistance and how to automatically enroll them into SJ Cares. SJCE expects to return to the City Council at a later date with more concrete recommendations to expand SJ Cares and the budget necessary to implement such a recommendation.

Approximately 75,000 SJCE customers are enrolled in SJ Cares and are expected to save over \$5.5 million this calendar year.

EVALUATION AND FOLLOW-UP

No further follow-up is expected.

COST SUMMARY/IMPLICATIONS

The typical GreenSource customer on one of the tariffs affected by the recommended rate change is expected to pay \$2.50 less per month for their SJCE generation charges. Total customer bill savings for this group of customers from the recommended May 2023 rate changes is expected to be approximately \$300,000 annually.

The total customer bill savings from extending SJ Cares to commercial rates is expected to be approximately \$50,000 annually. There is potential for additional customer savings following successful outreach to assisted living and supportive housing facilities eligible for CARE or FERA.

The recommendations are expected to reduce SJCE Energy Sales revenue by approximately \$220,000 in calendar year 2023 or \$45,000 for the remainder of 2022-2023 (from a budgeted estimate of \$505.9 million) if no further rate action is taken in 2023 by SJCE. Revenues and expenditures will continue to be monitored closely and, if determined necessary, recommended budget adjustments will be brought forward as part of the Budget Office Year-End Clean-Up memorandum for fiscal year 2022-2023.

COORDINATION

This memorandum has been coordinated with the City Attorney's Office and the City Manager's Budget Office.

PUBLIC OUTREACH

This memorandum will be posted on the City's Council Agenda website for the May 2, 2023 City Council meeting.

COMMISSION RECOMMENDATION AND INPUT

No commission recommendation or input is associated with this action.

CEQA

Not a Project, File No. PP17-008, General Procedure & Policy Making resulting in no changes to the physical environment.
