GENERAL FUND BALANCE

- The General Fund balances increased by \$73 million during the quarter and ended with a balance of \$398 million as of March 31, 2026. This increase is attributed to the receipt of property taxes in January, offset by operational expenditures. General Fund cash balances usually peak during the months of January and June, when the bulk of property taxes are received, and decline in the summer months due to retirement prefunding, debt service payments and operational expenditures.
- Projected investment maturities, cash and revenues are sufficient to cover anticipated expenditures for the next six months
